市場策略與顧客關係

中英雙語完整筆記 / Complete Bilingual Notes

運用市場組合制定策略，並管理長期顧客關係。

商品與服務市場策略（一）

Marketing Strategies for Goods and Services (I)

掌握市場營銷組合的四個元素，並能按產品、價格、分銷及推廣設計合適的商品市場策略。

Master the four elements of the marketing mix and design suitable goods marketing strategies for product, price, place and promotion.

市場營銷組合 Marketing Mix

市場營銷組合是企業可控制的市場營銷工具組合，通常包括產品、價格、地點及推廣，即 4Ps。

The marketing mix is a combination of controllable marketing tools, usually product, price, place and promotion, known as the 4Ps.

產品是企業提供給顧客以滿足需要的商品或服務；價格是顧客為取得產品而支付的金額；地點涉及分銷渠道；推廣則負責與目標顧客溝通。

Product is what a business offers to satisfy customer needs; price is what customers pay; place concerns distribution channels; promotion communicates with target customers.

四個元素必須互相配合。例如高級品牌若採用過低價格或不合適分銷渠道，可能削弱其定位。

The four elements must fit together. For example, a premium brand may weaken its positioning if it uses too low a price or unsuitable distribution channels.

產品策略 Product Strategies

產品屬性包括功能、品質、設計、耐用度及安全性。企業應按目標市場需要決定產品屬性，而不是單純增加功能。

Product attributes include features, quality, design, durability and safety. A business should choose attributes according to target market needs instead of simply adding functions.

品牌有助識別產品、建立形象、降低顧客選擇風險及提升忠誠度；強品牌亦可支持較高價格。

Branding helps identify products, build image, reduce customer choice risk and increase loyalty; a strong brand can also support higher prices.

包裝保護產品、便利運輸和使用，亦可吸引注意及傳達品牌形象；標籤提供成分、用法、來源、警告及其他法律或市場資訊。

Packaging protects products, supports transport and use, attracts attention and communicates brand image; labelling provides ingredients, usage, origin, warnings and other legal or marketing information.

產品支援服務如安裝、保養、保證及顧客服務，可增加產品價值，特別適合高價或技術性產品。

Product support services such as installation, maintenance, warranty and customer service add value, especially for expensive or technical products.

產品線延伸可向高端或低端擴展；產品線填補是在現有範圍內增加項目，以滿足更多細分需要。

Line stretching extends a product line upward or downward; line filling adds items within the existing range to meet more segment needs.

價格策略 Pricing Strategies

撇脂定價是在新產品推出初期設定較高價格，先吸引願意付高價的顧客，適合創新、競爭少或品牌形象強的產品。

Skimming pricing sets a high initial price for a new product to attract customers willing to pay more. It suits innovative products, low competition or strong brand image.

滲透定價是在推出初期設定較低價格，以快速吸引大量顧客和提高市場佔有率，適合需求價格彈性高或競爭激烈的市場。

Penetration pricing sets a low initial price to attract many customers quickly and increase market share. It suits price-sensitive or highly competitive markets.

定價要考慮成本、顧客願付價格、競爭者價格、品牌定位、需求彈性及企業目標。低價未必一定好，因為可能削弱形象或利潤。

Pricing should consider cost, customer willingness to pay, competitors' prices, brand positioning, demand elasticity and business objectives. Low price is not always best because it may weaken image or profit.

分銷策略 Place Strategies

市場營銷渠道是產品由生產者流向最終顧客的路徑，可包括批發商、零售商、代理、網上平台及直銷渠道。	A marketing channel is the route through which products move from producer to final customer, including wholesalers, retailers, agents, online platforms and direct channels.
直接分銷由企業直接向顧客銷售，能加強控制和顧客關係，但需要更多銷售及物流資源。	Direct distribution sells directly to customers, increasing control and customer relationships, but requiring more sales and logistics resources.
間接分銷透過中介接觸顧客，覆蓋較廣且可利用中介專業，但企業對價格、服務和品牌展示的控制較低。	Indirect distribution reaches customers through intermediaries, giving wider coverage and using their expertise, but reducing control over price, service and brand presentation.
密集式分銷適合便利品，讓產品盡量容易購買；獨家分銷只授權少數或一個中介，適合高級或專門產品；選擇性分銷介乎兩者之間。	Intensive distribution suits convenience products by maximising availability; exclusive distribution authorises one or few intermediaries and suits premium or specialised products; selective distribution lies between them.

推廣策略 Promotion Strategies

推廣組合包括廣告、銷售推廣、公關、個人銷售及直接市場營銷。企業應按目標市場、產品性質、預算和購買流程選擇工具。	The promotion mix includes advertising, sales promotion, public relations, personal selling and direct marketing. A business should choose tools according to target market, product nature, budget and buying process.
廣告可快速接觸大量顧客和建立品牌形象，但成本高且回應未必直接；銷售推廣如折扣、贈品和優惠券能刺激短期購買，但可能削弱品牌價值。	Advertising reaches many customers quickly and builds image, but can be costly and responses may not be direct; sales promotion such as discounts, gifts and coupons stimulates short-term buying but may weaken brand value.
公關透過新聞、活動和社會形象建立信任；個人銷售適合高價或複雜產品；直接市場營銷可向特定顧客傳遞個人化訊息。	Public relations builds trust through news, events and social image; personal selling suits expensive or complex products; direct marketing sends personalised messages to specific customers.

關鍵詞彙 Key Terms

市場營銷組合 Marketing mix 產品、價格、地點及推廣等可控制市場營銷工具的組合。 A combination of controllable marketing tools including product, price, place and promotion.	產品 Product 企業提供給顧客以滿足需要的商品或服務。 Goods or services offered by a business to satisfy customer needs.
價格 Price 顧客為取得產品而支付的金額。 The amount customers pay to obtain a product.	地點 / 分銷 Place / Distribution 讓產品到達目標顧客的渠道及安排。 Channels and arrangements that make products available to target customers.
推廣 Promotion 企業與目標顧客溝通並說服其購買的活動。 Activities used to communicate with and persuade target customers.	品牌 Branding 以名稱、符號、設計及形象識別並區分產品。 Using names, symbols, designs and image to identify and differentiate products.
產品線延伸 Line stretching 把產品線向較高或較低市場層次擴展。 Extending a product line upward or downward in the market.	產品線填補 Line filling 在現有產品線範圍內增加產品項目。 Adding product items within the existing product line range.

撇脂定價 Skimming pricing strategy

新產品初期定高價以先取得高願付價格顧客的策略。

Setting a high initial price to capture customers willing to pay more.

滲透定價 Penetration pricing strategy

新產品初期定低價以快速增加銷售和市場佔有率的策略。

Setting a low initial price to increase sales and market share quickly.

市場營銷渠道 Marketing channel

產品由生產者流向顧客的路徑。

The route through which products move from producers to customers.

直接分銷 Direct distribution

企業不經中介直接向顧客銷售。

Selling directly to customers without intermediaries.

間接分銷 Indirect distribution

企業透過中介向顧客銷售。

Selling to customers through intermediaries.

密集式分銷 Intensive distribution

透過大量銷售點令產品廣泛可得。

Making products widely available through many outlets.

獨家分銷 Exclusive distribution

只授權一個或少數中介銷售產品。

Authorising one or a few intermediaries to sell a product.

選擇性分銷 Selective distribution

選擇部分合適中介銷售產品。

Selecting some suitable intermediaries to sell a product.

推廣組合 Promotion mix tools

廣告、銷售推廣、公關、個人銷售及直接市場營銷等工具。

Tools such as advertising, sales promotion, public relations, personal selling and direct marketing.

DSE 作答提示 Exam Tips

市場營銷組合題要保持 4Ps 一致性。若品牌定位高級，產品、價格、分銷及推廣都應支持高級形象。

Marketing mix answers should show consistency across the 4Ps. If the brand is positioned as premium, product, price, place and promotion should support that image.

定價題要根據產品階段、競爭、需求彈性和品牌定位選擇撇脂或滲透，不要只說「高價賺更多」或「低價賣更多」。

For pricing questions, choose skimming or penetration according to product stage, competition, demand elasticity and positioning, not simply “high price earns more” or “low price sells more”.

分銷題常考產品性質。便利品多用密集式分銷，高級專門產品較適合選擇性或獨家分銷。

Distribution questions often test product nature. Convenience goods often use intensive distribution, while premium specialised products suit selective or exclusive distribution.

快速自測與答案 Quick Check and Answers

Q1. 為何高級護膚品牌未必適合密集式分銷？

Why may a premium skincare brand not suit intensive distribution?

答案：密集式分銷雖提高覆蓋，但可能削弱高級形象及服務控制；選擇性或獨家分銷較能維持品牌定位。

Answer: Intensive distribution increases coverage but may weaken premium image and service control; selective or exclusive distribution better maintains positioning.

Q2. 創新科技產品上市初期可為何採用撇脂定價？

Why may an innovative technology product use skimming pricing at launch?

答案：早期競爭較少且部分顧客願付高價，企業可先收回研發成本並建立高端形象。

Answer: Early competition may be limited and some customers are willing to pay more, so the firm can recover development costs and build a high-end image.

Q3. 個人銷售適合哪些產品？

What products suit personal selling?

答案：高價、複雜、需要示範或需要個別解釋的產品較適合，例如保險、工業設備或企業軟件。

Answer: Expensive, complex products requiring demonstration or individual explanation suit personal selling, such as insurance, industrial equipment or business software.

商品與服務市場策略（二）

Marketing Strategies for Goods and Services (II)

運用產品生命週期設計市場營銷策略，理解服務特性對市場營銷組合的影響，並比較傳統市場營銷與電子市場營銷。

Apply the product life cycle to marketing strategy design, understand how service characteristics affect the marketing mix, and compare traditional marketing with e-marketing.

產品生命週期 Product Life Cycle

產品生命週期描述產品由推出至退出市場的銷售及利潤變化，通常包括引入期、成長期、成熟期及衰退期。	The product life cycle describes changes in sales and profit from launch to withdrawal, usually including introduction, growth, maturity and decline stages.
引入期銷售增長慢、成本高、利潤低或虧損。策略重點是建立產品認知、吸引早期採用者及確保分銷。	In the introduction stage, sales grow slowly, costs are high and profit is low or negative. Strategies focus on awareness, early adopters and distribution.
成長期銷售快速上升、競爭者開始進入。企業可改善產品、擴大分銷、加強品牌偏好及調整價格。	In the growth stage, sales rise quickly and competitors enter. The business may improve products, expand distribution, strengthen brand preference and adjust prices.
成熟期銷售增長放緩，競爭激烈，利潤受壓。企業常用差異化、促銷、產品改良及尋找新用途來延長生命週期。	In maturity, sales growth slows, competition is intense and profit is under pressure. Businesses often use differentiation, promotion, product modification and new uses to extend the life cycle.
衰退期銷售下降，企業可選擇收割、縮減產品線、尋找利基市場或退出市場。	In decline, sales fall. A business may harvest, reduce the product line, seek niches or withdraw from the market.

服務的四項特性 Four Characteristics of Services

無形性表示服務不能在購買前被實物檢查，顧客較依賴品牌、口碑、員工形象及實體證據判斷質素。	Intangibility means services cannot be physically inspected before purchase, so customers rely more on brand, word of mouth, staff image and physical evidence to judge quality.
不可分割性表示服務的生產和消費常同時發生，顧客與員工互動會直接影響服務體驗。	Inseparability means production and consumption often happen at the same time, so customer–staff interaction directly affects the service experience.
異質性表示服務質素可能因員工、時間、地點或顧客而不同，因此企業需透過培訓、標準流程和監察提升一致性。	Heterogeneity means service quality may vary by staff, time, place or customer, so training, standard procedures and monitoring are needed for consistency.
易逝性表示服務不能儲存，未售出的酒店房間、航班座位或診症時段不能留待日後銷售。企業需管理需求和產能。	Perishability means services cannot be stored. Unsold hotel rooms, flight seats or consultation slots cannot be sold later, so demand and capacity must be managed.

服務市場營銷組合設計 Marketing Mix Design for Services

服務企業可用實體證據降低無形性，例如整潔環境、制服、網站、顧客評價、證書和服務保證。	Service businesses can reduce intangibility through physical evidence such as clean premises, uniforms, websites, customer reviews, certificates and service guarantees.
員工培訓、服務標準、預約制度及顧客參與管理，可改善不可分割性和異質性帶來的質素波動。	Staff training, service standards, booking systems and customer participation management can reduce quality variation caused by inseparability and heterogeneity.

為處理易逝性，企業可使用差別定價、預約、會員優惠、淡季推廣、兼職員工或自助服務來平衡需求和產能。

To handle perishability, businesses may use differential pricing, reservations, membership offers, off-peak promotions, part-time staff or self-service to balance demand and capacity.

電子市場營銷 E-marketing

電子市場營銷是運用互聯網、流動裝置、社交媒體、電郵、搜尋引擎及電子商務平台進行市場營銷活動。

E-marketing uses the internet, mobile devices, social media, email, search engines and e-commerce platforms for marketing activities.

與傳統市場營銷相比，電子市場營銷通常互動性較高、速度較快、資料可量度性較強，並可較容易進行個人化溝通。

Compared with traditional marketing, e-marketing is usually more interactive, faster, more measurable and better suited to personalised communication.

電子市場營銷亦有風險，例如私隱問題、負面口碑快速擴散、網絡安全、資訊過量和平台演算法變動。

E-marketing also has risks, such as privacy issues, rapid spread of negative word of mouth, cybersecurity, information overload and platform algorithm changes.

客製化與顧客化 Customisation and Customerisation

客製化是企業按顧客群或個別顧客需要調整產品、訊息或服務，例如推薦系統、個人化電郵或可選配置。

Customisation means the business adjusts products, messages or services for customer groups or individuals, such as recommendation systems, personalised emails or optional configurations.

顧客化進一步讓顧客直接參與設計產品或服務，例如自行選擇顏色、功能、套餐或內容。

Customerisation goes further by allowing customers to participate directly in designing products or services, such as choosing colours, features, packages or content.

個人化策略可提升相關性和顧客滿意，但企業要平衡資料收集成本、私隱、操作複雜度及顧客是否願意參與。

Personalisation strategies can improve relevance and satisfaction, but businesses must balance data collection cost, privacy, operational complexity and customer willingness to participate.

關鍵詞彙 Key Terms

產品生命週期 Product life cycle

產品由引入至衰退期間銷售及利潤變化的模式。

The pattern of sales and profit changes from introduction to decline.

引入期 Introduction stage

產品剛推出市場、銷售增長慢及成本高的階段。

The stage where a product is newly launched, sales grow slowly and costs are high.

成長期 Growth stage

產品銷售快速上升及市場接受度提高的階段。

The stage where sales rise quickly and market acceptance increases.

成熟期 Maturity stage

銷售增長放緩及競爭激烈的階段。

The stage where sales growth slows and competition is intense.

衰退期 Decline stage

銷售及利潤下降的階段。

The stage where sales and profit decline.

無形性 Intangibility

服務不能在購買前被實物看見、觸摸或儲存。

Services cannot be physically seen, touched or stored before purchase.

不可分割性 Inseparability

服務的生產和消費常同時發生。

Service production and consumption often occur at the same time.

異質性 Heterogeneity

服務質素可能因人、時間或地點而不同。

Service quality may vary by person, time or place.

易逝性 Perishability

服務不能儲存作日後銷售。

Services cannot be stored for later sale.

電子市場營銷 E-marketing

運用電子及網絡渠道進行市場營銷活動。

Using electronic and online channels for marketing activities.

客製化 Customisation

企業按顧客需要調整產品、服務或訊息。

The business adjusts products, services or messages according to customer needs.

顧客化 Customerisation

讓顧客直接參與設計產品或服務。

Allowing customers to participate directly in designing products or services.

DSE 作答提示 Exam Tips

產品生命週期題要先判斷階段，再配對 4Ps；不要只寫階段特徵而沒有策略。

For product life cycle questions, identify the stage first, then match the 4Ps; do not only describe stage characteristics without strategies.

服務特性題要寫「特性 → 問題 → 市場營銷應對」。例如無形性令顧客難以評估質素，所以要提供實體證據。

For service characteristics, write “characteristic → problem → marketing response”. For example, intangibility makes quality hard to assess, so provide physical evidence.

電子市場營銷比較題應同時寫優勢和風險，包括互動性、可量度性、個人化、私隱及負面口碑。

For e-marketing comparisons, cover both benefits and risks, including interactivity, measurability, personalisation, privacy and negative word of mouth.

快速自測與答案 Quick Check and Answers

Q1. 成熟期產品可如何延長產品生命週期？

How can a product in maturity extend its life cycle?

答案：可透過產品改良、尋找新用途、推出促銷、重新定位或開拓新細分市場延長銷售。

Answer: It can extend sales through product improvement, new uses, promotions, repositioning or new market segments.

Q2. 服務的易逝性對酒店有何影響？

How does perishability affect a hotel?

答案：未售出的房間不能留到翌日再賣，酒店需要用預約、淡季優惠及差別定價管理需求。

Answer: Unsold rooms cannot be stored for the next day, so the hotel needs reservations, off-peak offers and differential pricing to manage demand.

Q3. 電子市場營銷為何適合個人化推廣？

Why is e-marketing suitable for personalised promotion?

答案：企業可利用瀏覽、購買和會員資料分析顧客偏好，再向不同顧客推送相關訊息。

Answer: A business can analyse browsing, purchase and membership data to understand preferences and send relevant messages to different customers.

顧客關係管理

Customer Relationship Management

理解顧客關係管理的本質、目標和重要性，並能評估影響顧客忠誠的因素及提升忠誠度的市場策略。

Understand the nature, objectives and importance of customer relationship management, and evaluate factors affecting customer loyalty and strategies to enhance it.

顧客關係管理的本質 Nature of Customer Relationship Management

顧客關係管理是企業有系統地收集和運用顧客資料，建立、維持及深化與有價值顧客關係的過程。

Customer relationship management is the systematic process of collecting and using customer data to build, maintain and deepen relationships with valuable customers.

CRM 不只是科技系統，也涉及企業文化、員工服務、資料分析、溝通和長期顧客價值管理。

CRM is not only a technology system; it also involves business culture, staff service, data analysis, communication and long-term customer value management.

顧客終身價值是顧客在整個關係期間可為企業帶來的預期淨收益。企業應重視長期價值而非只追求一次性交易。

Customer lifetime value is the expected net return a customer brings during the whole relationship. A business should value long-term returns rather than only one-off transactions.

CRM 的目標與工具 Objectives and Tools of CRM

CRM 的目標包括了解顧客需要、提升顧客滿意、增加重複購買、降低顧客流失及提高每名顧客的收益。

CRM objectives include understanding customer needs, improving satisfaction, increasing repeat purchases, reducing customer defection and raising revenue per customer.

交叉銷售是向現有顧客銷售相關產品；升級銷售是鼓勵顧客購買較高價或更高級版本。兩者都依賴對顧客需要的了解。

Cross-selling sells related products to existing customers; upselling encourages customers to buy a higher-priced or upgraded version. Both rely on understanding customer needs.

個別市場營銷是根據個別顧客資料設計產品、服務或訊息，可提高相關性，但需要準確資料及私隱管理。

Individual marketing designs products, services or messages based on individual customer data. It improves relevance but requires accurate data and privacy management.

CRM 的重要性 Importance of CRM

維持現有顧客通常比吸引新顧客成本低。忠誠顧客可能重複購買、推薦他人、願意嘗試新產品，並對價格較不敏感。

Keeping existing customers is often cheaper than attracting new ones. Loyal customers may repurchase, recommend others, try new products and be less price-sensitive.

CRM 可協助企業把資源集中在高價值顧客，改善服務一致性，並透過顧客資料支持產品、推廣和服務決策。

CRM helps a business focus resources on high-value customers, improve service consistency and use customer data to support product, promotion and service decisions.

若 CRM 執行不當，例如過度推銷、濫用資料或服務承諾不一致，反而會降低信任和顧客忠誠。

If CRM is poorly implemented, such as excessive selling, misuse of data or inconsistent service promises, it may reduce trust and loyalty.

影響顧客忠誠的因素 Factors Affecting Customer Loyalty

顧客滿意是忠誠的重要基礎，來自產品質素、服務體驗、價格公平、便利性及期望是否被滿足。

Customer satisfaction is an important basis of loyalty and comes from product quality, service experience, fair price, convenience and whether expectations are met.

顧客連繫包括財務連繫、社交連繫、客製化連繫及結構性連繫。例如會員積分、專屬服務和系統整合都可提高轉換成本。	Customer bonds include financial, social, customised and structural bonds. Membership points, exclusive service and system integration can raise switching costs.
伙伴關係管理強調與供應商、中介、平台或其他伙伴合作，為顧客提供更完整及一致的價值。	Partner relationship management emphasises cooperation with suppliers, intermediaries, platforms or other partners to provide more complete and consistent value to customers.

提升顧客忠誠的策略 Strategies to Enhance Customer Loyalty

企業應先提供穩定產品質素和可靠服務，因為忠誠不能只靠積分或優惠建立。	A business should first provide consistent product quality and reliable service because loyalty cannot be built only on points or discounts.
會員計劃、個人化推薦、生日優惠、售後跟進及快速投訴處理，可增加顧客感到被重視的程度。	Membership programmes, personalised recommendations, birthday offers, after-sales follow-up and fast complaint handling can make customers feel valued.
企業應定期分析顧客流失原因，例如價格、服務問題、競爭者吸引或產品不合需要，並作針對性改善。	A business should regularly analyse reasons for customer defection, such as price, service problems, competitor attraction or product mismatch, and make targeted improvements.

關鍵詞彙 Key Terms

顧客關係管理 Customer relationship management 建立、維持及深化有價值顧客關係的管理過程。 The management process of building, maintaining and deepening valuable customer relationships.	顧客終身價值 Customer lifetime value 顧客在整段關係中預期為企業帶來的淨收益。 The expected net return a customer brings to a business over the whole relationship.
交叉銷售 Cross-selling 向現有顧客銷售相關或互補產品。 Selling related or complementary products to existing customers.	升級銷售 Upselling 鼓勵顧客購買較高價或較高級版本。 Encouraging customers to buy a higher-priced or upgraded version.
顧客忠誠 Customer loyalty 顧客持續購買並偏好某品牌或企業的傾向。 A customer's tendency to continue buying from and preferring a brand or business.	顧客流失 Customer defection 顧客停止購買並轉向競爭者或其他替代方案。 Customers stop buying and switch to competitors or alternatives.
個別市場營銷 Individual marketing 按個別顧客需要和資料設計市場營銷活動。 Designing marketing activities according to individual customer needs and data.	顧客滿意 Customer satisfaction 顧客感到產品或服務表現達到或超過期望的程度。 The extent to which product or service performance meets or exceeds customer expectations.
顧客連繫 Customer bonds 令顧客與企業保持關係的財務、社交、客製化或結構性連繫。 Financial, social, customised or structural links that keep customers connected to a business.	伙伴關係管理 Partner relationship management 管理與供應商、中介及合作伙伴的關係，以共同創造顧客價值。 Managing relationships with suppliers, intermediaries and partners to create customer value together.

DSE 作答提示 Exam Tips

CRM 題要避免只寫「多給折扣」。高分答案應包括資料運用、顧客滿意、長期價值、忠誠和流失管理。

For CRM questions, avoid only writing “give more discounts”. Strong answers cover data use, satisfaction, long-term value, loyalty and defection management.

分析顧客忠誠時，要分清滿意和忠誠。滿意是基礎，但忠誠還受轉換成本、品牌感情和競爭者吸引影響。

When analysing loyalty, distinguish satisfaction from loyalty. Satisfaction is a base, but loyalty is also affected by switching costs, brand attachment and competitors’ attraction.

交叉銷售和升級銷售要以顧客需要為前提，過度推銷會破壞信任。

Cross-selling and upselling must be based on customer needs; excessive selling damages trust.

快速自測與答案 Quick Check and Answers

Q1. 為何企業重視顧客終身價值？

Why do businesses value customer lifetime value?

答案：因為長期顧客可帶來重複購買、推薦和較低服務成本，企業可把資源集中於更有價值的顧客關係。

Answer: Long-term customers can bring repeat purchases, referrals and lower service costs, so the business can focus resources on more valuable relationships.

Q2. CRM 如何支持交叉銷售？

How can CRM support cross-selling?

答案：CRM 可分析顧客購買紀錄和偏好，找出相關產品需要，再向合適顧客提出相關建議。

Answer: CRM analyses purchase records and preferences to identify related product needs and make relevant offers to suitable customers.

Q3. 為何顧客滿意不一定等於顧客忠誠？

Why does customer satisfaction not necessarily equal customer loyalty?

答案：顧客即使滿意，仍可能因競爭者優惠、方便程度、價格或新鮮感而轉換品牌。

Answer: Even satisfied customers may switch because of competitors’ offers, convenience, price or desire for novelty.
