市場營銷與研究

中英雙語完整筆記 / Complete Bilingual Notes

理解市場營銷角色及市場研究流程。

市場營銷的角色

Role of Marketing

理解市場營銷及市場營銷概念，說明市場營銷對企業的重要性，並掌握市場營銷流程中的規劃、組織、執行及控制。

Understand marketing and the marketing concept, explain the importance of marketing to a business, and master planning, organising, implementing and controlling in the marketing process.

市場營銷與市場營銷概念 Marketing and the Marketing Concept

市場營銷是辨認、預測及滿足顧客需要，並同時達成企業目標的一連串活動。它不只是廣告或銷售，而是由了解顧客開始。

Marketing is a set of activities that identifies, anticipates and satisfies customer needs while achieving business objectives. It is not only advertising or selling, but starts with understanding customers.

市場營銷概念強調企業應以顧客需要為中心，透過提供合適價值取得顧客滿意，從而獲得長期盈利。

The marketing concept emphasises that a business should focus on customer needs, deliver suitable value, achieve customer satisfaction and earn long-term profit.

目標市場是企業希望服務的特定顧客群。企業不可能滿足所有人，因此要選擇最有吸引力及最能配合自身能力的市場。

A target market is a specific group of customers a business aims to serve. A business cannot satisfy everyone, so it chooses markets that are attractive and match its capabilities.

市場營銷的重要性 Importance of Marketing

市場營銷協助企業了解顧客需要、設計合適產品、設定合理價格、選擇分銷渠道及推廣訊息，從而增加銷售和市場佔有率。

Marketing helps a business understand customer needs, design suitable products, set appropriate prices, choose distribution channels and communicate messages, thereby increasing sales and market share.

良好市場營銷可提升顧客滿意、品牌形象及顧客忠誠，降低顧客流失，亦有助企業在競爭中建立差異化。

Good marketing improves customer satisfaction, brand image and customer loyalty, reduces customer loss and helps the business differentiate itself from competitors.

市場營銷亦能把市場資訊帶回企業，讓生產、財務、人力資源及管理層作出更貼近市場的決策。

Marketing also brings market information back to the business so production, finance, human resources and management can make decisions closer to market needs.

市場營銷規劃 Planning Marketing Activities

市場營銷規劃通常由分析情況開始，包括了解企業內部能力及外部環境。SWOT 分析把優勢、劣勢、機會及威脅整理成決策基礎。

Marketing planning usually starts with situation analysis, including internal capabilities and the external environment. SWOT analysis summarises strengths, weaknesses, opportunities and threats as a basis for decisions.

市場營銷目標應清晰、可量度及有時限，例如提高市場佔有率、增加新顧客、改善品牌認知或提升顧客滿意度。

Marketing objectives should be clear, measurable and time-bound, such as increasing market share, gaining new customers, improving brand awareness or raising customer satisfaction.

企業可按競爭地位選擇策略。市場領導者重視保持優勢；挑戰者主動爭奪份額；追隨者模仿並避開正面衝突；利基者專注小而特定的市場。

A business may choose strategies according to competitive position. Market leaders defend advantages; challengers compete for share; followers imitate and avoid direct conflict; nichers focus on a small specific market.

市場營銷組合與資源 Marketing Mix and Resources

市場營銷組合通常指 4Ps：產品、價格、地點及推廣。四項工具必須互相配合，才能向目標市場提供一致價值。	The marketing mix usually refers to the 4Ps: product, price, place and promotion. The four tools must fit together to deliver consistent value to the target market.
產品決策涉及功能、品質、包裝、品牌及售後服務；價格決策影響收入、定位和競爭反應。	Product decisions involve features, quality, packaging, branding and after-sales service; price decisions affect revenue, positioning and competitors' reactions.
地點決策處理分銷渠道及便利性；推廣決策則包括廣告、銷售推廣、公關及個人銷售。企業要按預算、人手及時間分配市場營銷資源。	Place decisions deal with distribution channels and convenience; promotion decisions include advertising, sales promotion, public relations and personal selling. A business allocates marketing resources according to budget, staff and time.

組織及執行市場營銷活動 Organising and Implementing Marketing Activities

功能式組織按市場營銷工作分工，例如廣告、銷售及研究，適合產品線較少的企業，但部門間可能缺乏整體產品責任。	Functional organisation divides marketing work by function, such as advertising, sales and research. It suits businesses with few product lines but may lack overall product responsibility.
產品式組織按產品或品牌劃分責任，適合產品種類多的企業；地區式組織按地理市場管理，適合不同地區需要差異大的企業。	Product organisation assigns responsibility by product or brand and suits businesses with many products; geographical organisation manages by region and suits markets with different local needs.
顧客管理式組織按顧客類型服務，例如企業客戶、零售客戶或政府客戶，能更貼近不同顧客群需要。	Customer management organisation serves customers by type, such as corporate, retail or government customers, making it easier to meet the needs of different customer groups.
執行市場營銷活動時，企業要把計劃轉化為具體工作，安排人手、預算、時間表、合作伙伴及部門協調。	When implementing marketing activities, a business turns plans into specific tasks and arranges staff, budgets, schedules, partners and interdepartmental coordination.

控制市場營銷活動 Controlling Marketing Activities

控制是把實際成果與目標比較，找出差異並採取修正行動。常用指標包括銷售額、市場佔有率、顧客滿意度、推廣回應率及成本。	Controlling compares actual results with objectives, identifies differences and takes corrective action. Common measures include sales, market share, customer satisfaction, promotion response rate and cost.
若市場營銷活動未達目標，企業應分析原因，例如目標不合理、預算不足、推廣訊息不清、渠道不合適或競爭反應強烈。	If marketing activities fail to meet objectives, the business should analyse causes such as unrealistic targets, insufficient budget, unclear messages, unsuitable channels or strong competitor reactions.
有效控制不應只在活動結束後進行，還應在執行期間定期檢查，讓企業及早修正策略。	Effective control should not happen only after the activity ends; regular checks during implementation allow the business to correct strategies earlier.

關鍵詞彙 Key Terms

市場營銷 Marketing 辨認、預測及滿足顧客需要，同時達成企業目標的活動。 Activities that identify, anticipate and satisfy customer needs while achieving business objectives.	市場營銷概念 Marketing concept 以顧客需要和顧客滿意為中心來達成長期盈利的經營理念。 A business philosophy that focuses on customer needs and satisfaction to achieve long-term profit.
--	---

顧客滿意 Customer satisfaction

顧客感到產品或服務表現達到或超過期望的程度。

The extent to which customers feel that product or service performance meets or exceeds expectations.

目標市場 Target market

企業選擇集中服務的特定顧客群。

A specific customer group selected by a business to serve.

市場營銷計劃 Marketing plan

列明市場分析、目標、策略、資源及控制方法的計劃。

A plan setting out market analysis, objectives, strategies, resources and control methods.

SWOT 分析 SWOT analysis

分析優勢、劣勢、機會及威脅的工具。

A tool for analysing strengths, weaknesses, opportunities and threats.

市場營銷目標 Marketing objectives

企業希望市場營銷活動達成的具體成果。

Specific results a business wants its marketing activities to achieve.

市場細分 Market segment

具有相似需要或特徵的一組顧客。

A group of customers with similar needs or characteristics.

市場領導者 Market leader

在市場佔有率或影響力上居領先地位的企業。

A business with a leading market share or influence.

市場挑戰者 Market challenger

主動挑戰領導者並爭取市場份額的企業。

A business that actively challenges the leader and seeks market share.

市場追隨者 Market follower

跟隨主要企業策略並避免直接競爭的企業。

A business that follows major firms' strategies and avoids direct competition.

市場利基者 Market nicher

專注服務小而特定市場的企業。

A business focusing on a small specific market.

市場營銷組合 Marketing mix

產品、價格、地點及推廣等可控制市場營銷工具的組合。

The combination of controllable marketing tools such as product, price, place and promotion.

功能式組織 Functional organisation

按市場營銷功能分工的組織方式。

An organisation structure divided according to marketing functions.

產品式組織 Product organisation

按產品或品牌劃分市場營銷責任的組織方式。

An organisation structure assigning marketing responsibility by product or brand.

地區式組織 Geographical organisation

按地理市場劃分市場營銷責任的組織方式。

An organisation structure assigning marketing responsibility by geographical market.

顧客管理式組織 Customer management organisation

按顧客類型劃分市場營銷責任的組織方式。

An organisation structure assigning marketing responsibility by customer type.

DSE 作答提示 Exam Tips

市場營銷題不要把答案寫成「多賣產品」即可。高分答案應連結顧客需要、顧客滿意、目標市場及長期盈利。

For marketing questions, do not simply answer “sell more products”. A strong answer links customer needs, customer satisfaction, target market and long-term profit.

分析市場營銷流程時，可按「規劃、組織、執行、控制」四步寫，並在每步加入案例情境。

When analysing the marketing process, structure the answer as planning, organising, implementing and controlling, and apply the case to each step.

選擇組織結構時，要看產品種類、地區差異、顧客差異及企業規模，而不是只列定義。

When choosing an organisation structure, consider product variety, regional differences, customer differences and business size instead of only giving definitions.

快速自測與答案 Quick Check and Answers

Q1. 市場營銷概念與單純銷售有何不同？

How is the marketing concept different from simply selling?

答案：市場營銷概念由顧客需要出發，透過顧客滿意取得長期盈利；單純銷售較集中把現有產品賣出去。

Answer: The marketing concept starts from customer needs and earns long-term profit through satisfaction; simple selling focuses more on selling existing products.

Q2. 為何企業要設定可量度的市場營銷目標？

Why should a business set measurable marketing objectives?

答案：可量度目標讓企業分配資源、監察進度及比較實際成果，方便作出修正行動。

Answer: Measurable objectives help allocate resources, monitor progress and compare actual results so corrective action can be taken.

Q3. 產品種類很多的企業為何可能採用產品式組織？

Why may a business with many product lines use product organisation?

答案：每個產品或品牌可由專責人員管理，較能配合不同產品的目標市場、競爭和市場營銷組合。

Answer: Each product or brand can be managed by responsible staff, better matching its target market, competition and marketing mix.

市場研究

Marketing Research

理解市場研究的目的和重要性，掌握市場研究流程，並能比較第一手及第二手資料、不同資料收集方法與抽樣方式。

Understand the purpose and importance of marketing research, master the research process, and compare primary and secondary data, data collection methods and sampling methods.

市場研究的定義與重要性 Definition and Importance of Marketing Research

市場研究是有系統地收集、分析及解釋與市場營銷問題有關的資料，以支援市場營銷決策。	Marketing research is the systematic collection, analysis and interpretation of information related to marketing problems to support marketing decisions.
市場研究可協助企業了解顧客需要、購買行為、競爭對手、市場趨勢及市場營銷組合的成效。	Marketing research helps a business understand customer needs, buying behaviour, competitors, market trends and the effectiveness of the marketing mix.
進行市場研究可降低決策風險，但不能完全消除風險，因為資料可能過時、樣本有偏差或市場環境突然改變。	Marketing research reduces decision risk but cannot remove it completely because information may be outdated, samples may be biased or the market environment may change suddenly.

市場研究流程 Marketing Research Process

第一步是界定研究問題和目標。若問題定義不清，後續資料收集即使大量也可能無法支持決策。	The first step is defining the research problem and objectives. If the problem is unclear, even large amounts of data may not support decisions.
第二步是設計研究計劃，包括決定所需資料、資料來源、研究方法、抽樣方式、時間和預算。	The second step is designing the research plan, including required information, data sources, research methods, sampling method, time and budget.
第三步是收集資料，第四步是整理和分析資料，第五步是報告結果並提出建議。結果應以清晰圖表和結論支援管理決策。	The third step is collecting data, the fourth is organising and analysing data, and the fifth is reporting findings and recommendations. Results should support management decisions with clear charts and conclusions.

第一手與第二手資料 Primary and Secondary Data

第一手資料是企業為特定研究目的而直接收集的新資料，例如問卷、訪問、觀察或實驗所得資料。	Primary data are new data collected directly for a specific research purpose, such as data from questionnaires, interviews, observation or experiments.
第一手資料較貼合研究目標，資料較新和可控制，但成本較高、需時較長，設計不當亦會產生偏差。	Primary data fit research objectives better and can be current and controlled, but they cost more, take longer and may be biased if poorly designed.
第二手資料是已由其他人士或機構收集的資料，例如政府統計、行業報告、公司記錄、網上資料及報章文章。	Secondary data are data already collected by others, such as government statistics, industry reports, company records, online information and newspaper articles.
第二手資料成本較低且取得較快，適合初步分析；但可能不完全切合研究問題、資料過時或來源可靠性不足。	Secondary data are cheaper and quicker to obtain and suit preliminary analysis, but may not fully fit the research problem, may be outdated or may lack source reliability.

資料收集方法 Data Collection Methods

問卷調查可向大量受訪者收集標準化資料，方便量化比較，但問題設計、回覆率及受訪者是否誠實會影響結果。	Survey research collects standardised data from many respondents and allows quantitative comparison, but question design, response rate and honesty affect results.
實驗研究透過改變某項因素並觀察結果，較能測試因果關係，例如測試不同價格或包裝對銷售的影響。	Experimental research changes one factor and observes results, making it more suitable for testing cause-and-effect, such as the impact of different prices or packaging on sales.
定性研究重視深入了解意見、動機及感受。深入訪問適合個別深入探討；焦點小組可觀察群體討論和互動。	Qualitative research focuses on deep understanding of opinions, motives and feelings. In-depth interviews suit individual exploration; focus groups observe group discussion and interaction.
觀察研究記錄顧客實際行為，例如店內路線、停留時間或產品使用方式，但未必能解釋行為背後原因。	Observational research records actual customer behaviour, such as store movement, time spent or product usage, but may not explain the reasons behind behaviour.

抽樣方法與抽樣考慮 Sampling Methods and Considerations

抽樣是從整個目標群體中選取部分成員收集資料。好的樣本應能代表目標市場，否則結果可能有偏差。	Sampling selects part of the target population to collect data. A good sample should represent the target market; otherwise results may be biased.
隨機抽樣讓每個成員有同等被選機會，偏差較低，但需要完整名單和較多資源。	Random sampling gives every member an equal chance of selection and reduces bias, but requires a complete list and more resources.
分層隨機抽樣先按特徵把群體分層，再在每層隨機抽樣，可確保重要群體被包括，例如不同年齡或收入組別。	Stratified random sampling divides the population into strata and then randomly samples within each stratum, ensuring key groups such as age or income groups are included.
方便抽樣選取最容易接觸的人，成本低且快速，但代表性較弱，較容易出現抽樣偏差。	Convenience sampling selects people who are easiest to reach. It is cheap and quick but less representative and more likely to have sampling bias.
選擇抽樣方法時應考慮研究目標、目標群體特徵、樣本大小、準確度要求、時間、成本及能否取得受訪者名單。	When choosing a sampling method, consider research objectives, population characteristics, sample size, accuracy required, time, cost and access to a respondent list.

研究設計質素與限制 Research Quality and Limitations

有效問卷應使用清晰、中立及容易理解的問題，避免引導性問題、雙重問題及過長問卷。	An effective questionnaire uses clear, neutral and easy-to-understand questions and avoids leading questions, double-barrelled questions and overly long questionnaires.
研究結果應與研究目標一致，並清楚說明樣本、方法及限制，避免把小樣本結果過度推廣到整個市場。	Research findings should match research objectives and clearly state sample, method and limitations, avoiding over-generalising small-sample results to the whole market.
市場研究只提供決策參考。企業仍需結合成本、競爭、企業能力和管理判斷，才可作出最終市場營銷決策。	Marketing research only provides decision support. A business still needs to combine cost, competition, capabilities and managerial judgement before making final marketing decisions.

關鍵詞彙 Key Terms

市場研究 Marketing research 有系統地收集、分析及解釋市場相關資料以支援決策的過程。 The systematic process of collecting, analysing and interpreting market-related information to support decisions.	第一手資料 Primary data 為特定研究目的直接收集的新資料。 New data collected directly for a specific research purpose.
--	---

第二手資料 Secondary data

已由其他來源收集並可供使用的資料。

Data already collected by other sources and available for use.

問卷調查法 Survey research method

透過標準化問題向受訪者收集資料的方法。

A method that collects data from respondents using standardised questions.

實驗研究法 Experimental research method

改變某項因素並觀察其影響的研究方法。

A research method that changes a factor and observes its effect.

定性研究法 Qualitative research method

深入了解意見、動機及感受的研究方法。

A research method for deeply understanding opinions, motives and feelings.

深入訪問 In-depth interview

與個別受訪者進行深入而彈性的訪談。

A detailed and flexible interview with an individual respondent.

焦點小組 Focus group

由主持人引導一小組受訪者討論指定議題。

A small group discussion on a topic guided by a moderator.

觀察研究 Observational research

透過觀察和記錄實際行為收集資料的方法。

A method of collecting data by observing and recording actual behaviour.

隨機抽樣 Random sampling

每個成員都有同等被選機會的抽樣方法。

A sampling method in which every member has an equal chance of being selected.

分層隨機抽樣 Stratified random sampling

先把群體分成不同層，再於每層隨機抽樣。

A sampling method that divides the population into strata and randomly samples within each stratum.

方便抽樣 Convenience sampling

選取最容易接觸的受訪者作樣本。

A sampling method that selects respondents who are easiest to reach.

抽樣偏差 Sampling bias

樣本不能代表目標群體而導致結果偏離真實情況。

Bias caused when a sample does not represent the target population.

DSE 作答提示 Exam Tips

比較第一手和第二手資料時，要同時寫「切合程度、成本、時間、可靠性及新舊程度」。

When comparing primary and secondary data, cover fitness for purpose, cost, time, reliability and timeliness.

選擇研究方法時要連結研究目標。要量化比例可用問卷；要了解原因和動機可用深入訪問或焦點小組。

When choosing a research method, link it to the objective. Use surveys to quantify proportions; use in-depth interviews or focus groups to understand reasons and motives.

抽樣題常考代表性。方便抽樣快而便宜，但代表性弱；分層隨機抽樣較能包括重要群體。

Sampling questions often test representativeness. Convenience sampling is quick and cheap but weak in representativeness; stratified random sampling better includes important groups.

快速自測與答案 Quick Check and Answers

Q1. 市場研究為何不能完全消除市場營銷決策風險？

Why can marketing research not completely remove marketing decision risk?

答案：因為資料可能過時、樣本有偏差、受訪者答案不準確，或市場環境在研究後改變。

Answer: Information may be outdated, samples may be biased, respondents may give inaccurate answers or the market environment may change after the research.

Q2. 企業想知道新包裝是否提高銷售，較適合使用哪種研究方法？

Which research method suits a business wanting to know whether new packaging increases sales?

答案：較適合用實驗研究，因為企業可改變包裝並比較銷售變化，較能測試因果關係。

Answer: Experimental research is more suitable because the business can change packaging and compare sales changes, making it better for testing cause-and-effect.

Q3. 為何方便抽樣的結果未必可靠？

Why may results from convenience sampling be unreliable?

答案：因為樣本只包括容易接觸的人，可能不能代表整個目標市場，容易產生抽樣偏差。

Answer: The sample includes only people who are easy to reach and may not represent the whole target market, causing sampling bias.
