期末調整

中英雙語完整筆記 / Complete Bilingual Notes

處理應計、預付、壞帳及呆帳準備對財務報表的影響。

應計與預付

Accruals and Prepayments

分辨現金制與應計制，理解應計項目和預付項目的處理，並能編製相關調整分錄、轉回分錄及經調整財務報表。

Distinguish cash accounting from accrual accounting, understand the treatment of accruals and prepayments, and prepare related adjusting entries, reversing entries and adjusted financial statements.

現金制與應計制 Cash Accounting and Accrual Accounting

現金制按實際收款或付款日期確認收入和費用，簡單但未必能反映本期真正賺取的收入和發生的費用。

Cash accounting recognises income and expenses when cash is received or paid. It is simple but may not show the income earned and expenses incurred in the period.

應計制按收入賺取和費用發生的期間確認項目，而不是按現金收付日期確認。這能較公平地反映本期財務表現。

Accrual accounting recognises items in the period when income is earned and expenses are incurred, not when cash is received or paid. This gives a fairer view of financial performance.

權責發生概念要求期末作調整，把收入及費用歸入正確會計期間。應計、預付、預收和應收收入都是期末調整的常見項目。

The accrual concept requires period-end adjustments so income and expenses are matched to the correct accounting period. Accruals, prepayments, deferred revenue and accrued revenue are common adjustments.

應計費用與預付費用 Accrued Expenses and Prepaid Expenses

應計費用是本期已發生但尚未付款的費用。調整時借記相關費用，貸記應計費用，令費用及流動負債增加。

Accrued expenses are expenses incurred in the current period but not yet paid. The adjustment debits the expense and credits accrued expenses, increasing expense and current liabilities.

預付費用是已付款但屬於未來期間的費用。調整時借記預付費用，貸記相關費用，令本期費用減少並確認流動資產。

Prepaid expenses are payments made for future periods. The adjustment debits prepaid expenses and credits the expense, reducing current-period expense and recognising a current asset.

若題目給出已付金額和期初/期末應計或預付，可用公式推算本期費用：
本期費用 = 已付金額 + 期末應計 - 期初應計 - 期末預付 + 期初預付。

If cash paid and opening or closing accruals/prepayments are given, period expense can be derived as: cash paid + closing accrual - opening accrual - closing prepayment + opening prepayment.

應收收入與預收收入 Accrued Revenues and Deferred Revenues

應收收入是本期已賺取但尚未收到現金的收入。調整時借記應收收入，貸記相關收入，令收入及流動資產增加。

Accrued revenue is income earned in the current period but not yet received in cash. The adjustment debits accrued revenue and credits income, increasing income and current assets.

預收收入或遞延收入是已收款但屬於未來期間的收入。調整時借記相關收入，貸記預收收入，令本期收入減少並確認流動負債。

Deferred revenue is cash received for income relating to future periods. The adjustment debits income and credits deferred revenue, reducing current-period income and recognising a current liability.

分析收入調整時，先判斷本期真正賺取的金額，再與已收現金比較。已賺取但未收是資產；已收但未賺取是負債。

For revenue adjustments, identify the amount actually earned in the period and compare it with cash received. Earned but not received is an asset; received but not earned is a liability.

調整分錄與轉回分錄 Adjusting Entries and Reversing Entries

調整分錄在期末記錄，使收入、費用、資產及負債反映正確期間。所有調整分錄仍須符合複式記帳。	Adjusting entries are recorded at period–end so income, expenses, assets and liabilities reflect the correct period. All adjusting entries must still follow double entry.
轉回分錄通常在下一會計期間開始時作出，方向與部分期末調整分錄相反，方便下一期按現金收付記錄時不重複確認收入或費用。	Reversing entries are usually made at the start of the next period in the opposite direction to certain period–end adjustments, helping avoid double recognition when cash is later recorded.
應計費用和應收收入常可在下一期轉回；預付費用和預收收入是否轉回，取決於企業採用的記帳方法和題目要求。	Accrued expenses and accrued revenues are commonly reversed in the next period. Whether prepaid expenses and deferred revenues are reversed depends on the accounting method and the question requirement.

財務報表影響 Effects on Financial Statements

應計費用會增加本期費用及流動負債，降低利潤；預付費用會減少本期費用並增加流動資產，提高利潤。	Accrued expenses increase current–period expenses and current liabilities, reducing profit; prepaid expenses reduce current–period expenses and increase current assets, increasing profit.
應收收入會增加本期收入及流動資產，提高利潤；預收收入會減少本期收入並增加流動負債，降低利潤。	Accrued revenues increase current–period income and current assets, increasing profit; deferred revenues reduce current–period income and increase current liabilities, reducing profit.
財務狀況表應列示期末尚未結清的應計、預付、應收及預收項目；損益表則只列示屬於本期的收入和費用。	The statement of financial position shows outstanding accruals, prepayments, accrued revenues and deferred revenues at period–end; the income statement shows only income and expenses belonging to the current period.

關鍵詞彙 Key Terms

現金制 Cash accounting 按現金收付日期確認收入及費用的會計方法。 An accounting basis that recognises income and expenses when cash is received or paid.	應計制 Accrual accounting 按收入賺取及費用發生的期間確認收入及費用的會計方法。 An accounting basis that recognises income when earned and expenses when incurred.
權責發生概念 Accrual concept 收入及費用應歸入其賺取或發生的會計期間。 Income and expenses should be recorded in the accounting period in which they are earned or incurred.	應計費用 Accrued expenses 本期已發生但期末尚未支付的費用。 Expenses incurred in the current period but not yet paid at period–end.
預付費用 Prepaid expenses 已支付但屬於未來會計期間的費用。 Expenses already paid that relate to future accounting periods.	應收收入 Accrued revenues 本期已賺取但期末尚未收到的收入。 Income earned in the current period but not yet received at period–end.
預收收入 Deferred revenues 已收到但屬於未來會計期間的收入。 Income received in advance that relates to future accounting periods.	調整分錄 Adjusting entries 期末為使帳目反映正確期間而作出的分錄。 Period–end entries made to reflect the correct accounting period.
轉回分錄 Reversing entries 下一期初把部分期末調整分錄反向記錄的分錄。 Entries made at the start of the next period to reverse certain period–end adjustments.	流動資產 Current assets 預期在短期內變現、出售或使用的資產。 Assets expected to be realised, sold or used in the short term.

流動負債 Current liabilities

預期在短期內清償的負債。

Liabilities expected to be settled in the short term.

DSE 作答提示 Exam Tips

期末調整題先問「本期應確認多少？」再處理已收或已付現金。不要把現金收付當作收入或費用。

For period-end adjustments, first ask “how much belongs to this period?” before dealing with cash received or paid. Do not treat cash movements directly as income or expense.

應計通常形成負債或資產：應計費用是負債，應收收入是資產；預付費用是資產，預收收入是負債。

Accruals usually create liabilities or assets: accrued expenses are liabilities, accrued revenues are assets; prepaid expenses are assets, deferred revenues are liabilities.

若題目要求轉回分錄，分清它是在下一期初記錄，且方向與原調整分錄相反。

If reversing entries are required, remember they are recorded at the start of the next period and are opposite to the original adjusting entries.

快速自測與答案 Quick Check and Answers

Q1. 為何已付款不一定代表本期費用？

Why does cash paid not necessarily mean current-period expense?

答案：因為付款可能包括未來期間的服務或利益。根據應計制，只有屬於本期的部分才列作本期費用，其餘列為預付費用。

Answer: Payment may relate to services or benefits for future periods. Under accrual accounting, only the current-period portion is expensed and the rest is recorded as prepaid expense.

Q2. 期末尚未支付的水電費應如何調整？

How should unpaid utilities at period-end be adjusted?

答案：借記水電費，貸記應計費用。這會增加本期費用及流動負債，並降低利潤。

Answer: Debit utilities expense and credit accrued expenses. This increases current-period expense and current liabilities, reducing profit.

Q3. 預收租金為何是負債？

Why is rent received in advance a liability?

答案：因為企業已收現金但尚未提供相應期間的使用權或服務，未賺取部分須在未來履行。

Answer: The business has received cash but has not yet provided the use or service for the related period, so the unearned part must be fulfilled in the future.

壞帳與呆帳準備

Bad Debts and Allowance for Doubtful Accounts

理解壞帳及呆帳準備的需要，記錄壞帳撇銷、呆帳準備調整和壞帳收回，並列示應收帳款的可變現淨值。

Understand the need for bad debt write-off and allowance for doubtful accounts, record bad debts, allowance adjustments and bad debts recovered, and present trade receivables at net realisable value.

壞帳與信貸風險 Bad Debts and Credit Risk

壞帳是確定無法收回的應收帳款，例如顧客破產或長期失聯。撇銷壞帳時，借記壞帳，貸記應收帳款。

Bad debts are trade receivables confirmed to be uncollectible, such as when a customer is bankrupt or untraceable. To write off a bad debt, debit bad debts and credit trade receivables.

壞帳撇銷會減少應收帳款和本期利潤。若之前已為該債務作出特定準備，題目可能要求先使用或調整相關準備。

Writing off bad debts reduces trade receivables and current-period profit. If a specific allowance has already been made, the question may require using or adjusting that allowance.

信貸銷售能增加銷售機會，但帶來不能收款風險。因此企業須定期檢討應收帳款質素。

Credit sales can increase sales opportunities but create collection risk. Businesses therefore need to review the quality of trade receivables regularly.

呆帳準備的目的 Purpose of Allowance for Doubtful Accounts

呆帳準備是對可能無法收回的應收帳款作出的估計。它不直接沖銷個別顧客帳戶，而是以抵銷資產帳戶列示。

Allowance for doubtful accounts is an estimate of receivables that may not be collected. It does not directly write off individual customer accounts and is shown as a contra-asset account.

建立呆帳準備符合審慎概念，避免高估應收帳款；亦符合配比概念，把估計信貸損失與相關銷售期間配對。

Creating an allowance applies prudence by avoiding overstatement of receivables, and applies matching by matching estimated credit losses with the related sales period.

財務狀況表通常列示應收帳款減呆帳準備後的可變現淨值，即預期可收回金額。

The statement of financial position normally shows trade receivables less allowance for doubtful accounts as net realisable value, the expected recoverable amount.

特定準備、一般準備與帳齡分析 Specific Allowance, General Allowance and Ageing Schedule

特定準備是針對某些已出現明顯收款風險的顧客作出的準備，例如已知顧客財務困難。

Specific allowance is made for particular customers with clear collection risk, such as known financial difficulty.

一般準備是按整體應收帳款的估計風險作出的準備，常以期末應收帳款扣除已撇銷壞帳及特定準備後的一定百分比計算。

General allowance is made for the estimated overall risk of receivables, often calculated as a percentage of closing receivables after bad debts written off and specific allowances.

帳齡分析把應收帳款按逾期時間分類。逾期越久，預期不能收回風險通常越高，準備百分比亦可能越高。

An ageing schedule classifies receivables by how long they have been outstanding. The longer overdue, the higher the expected default risk and allowance rate may be.

呆帳準備調整分錄 Entries for Allowance Adjustments

若期末所需呆帳準備高於現有準備，需增加準備。分錄為借記呆帳準備調整或壞帳費用，貸記呆帳準備。

If required closing allowance is higher than the existing allowance, increase the allowance. Debit allowance adjustment or bad debt expense and credit allowance for doubtful accounts.

若期末所需呆帳準備低於現有準備，需減少準備。分錄為借記呆帳準備，貸記呆帳準備調整或壞帳費用。	If required closing allowance is lower than the existing allowance, reduce the allowance. Debit allowance for doubtful accounts and credit allowance adjustment or bad debt expense.
損益表只列示本期呆帳費用加上呆帳準備增加，或扣除呆帳準備減少；財務狀況表列示期末所需準備。	The income statement reports current bad debts plus any increase in allowance, or less any decrease in allowance; the statement of financial position shows the required closing allowance.

壞帳收回 **Bad Debts Recovered**

壞帳收回是過往已撤銷的壞帳其後收到現金。它不應直接記入銷售，因為原銷售已在過往期間確認。	Bad debts recovered are cash receipts from debts previously written off. They should not be recorded as sales because the original sales were recognised in an earlier period.
常見處理是借記現金或銀行，貸記壞帳收回。壞帳收回列作本期收入或從壞帳費用中扣減，按題目格式處理。	A common treatment is to debit cash or bank and credit bad debts recovered. The recovery is reported as income or deducted from bad debt expense, depending on the required format.
若先恢復顧客帳戶，則先借記應收帳款、貸記壞帳收回，再收款時借記銀行、貸記應收帳款。	If the customer account is reinstated first, debit trade receivables and credit bad debts recovered, then debit bank and credit trade receivables when cash is received.

關鍵詞彙 **Key Terms**

壞帳 Bad debts 已確定無法收回並須撤銷的應收帳款。 Trade receivables confirmed to be uncollectible and written off.	呆帳準備 Allowance for doubtful accounts 對可能無法收回應收帳款作出的估計扣減。 An estimated deduction for receivables that may not be collected.
審慎概念 Prudence concept 在不確定下避免高估資產和收入、低估負債和費用。 Avoiding overstatement of assets and income and understatement of liabilities and expenses under uncertainty.	配比概念 Matching concept 把產生收入所需的相關費用配對至同一會計期間。 Matching costs incurred to generate revenue with the same accounting period.
特定準備 Specific allowance 針對個別有收款風險顧客作出的呆帳準備。 Allowance made for specific customers with collection risk.	一般準備 General allowance 按整體應收帳款風險估計的呆帳準備。 Allowance estimated for the overall risk of trade receivables.
帳齡分析 Ageing schedule 按應收帳款逾期時間分類以評估收款風險的表。 A schedule classifying receivables by age to assess collection risk.	抵銷資產帳戶 Contra-asset account 用來扣減相關資產帳面金額的帳戶。 An account used to reduce the carrying amount of a related asset.
可變現淨值 Net realisable value 預期可從資產收回的淨額。 The net amount expected to be recovered from an asset.	壞帳收回 Bad debts recovered 過往已撤銷壞帳其後收回的款項。 Cash recovered from debts previously written off.
應收帳款 Trade receivables 顧客因賒銷而欠企業的款項。 Amounts owed by customers from credit sales.	

DSE 作答提示 Exam Tips

先撇銷明確壞帳，再按調整後應收帳款計算期末呆帳準備。次序錯誤會令準備金額出錯。

Write off specific bad debts first, then calculate closing allowance based on adjusted trade receivables. Wrong sequence gives a wrong allowance.

損益表看「本期變動」，財務狀況表看「期末餘額」。呆帳準備題常考這兩者的分別。

The income statement shows the current-period movement, while the statement of financial position shows the closing balance. This distinction is often tested.

壞帳收回不是銷售收入。它是過往撇銷後重新收回的款項，應作壞帳收回收入或壞帳費用扣減處理。

Bad debts recovered are not sales revenue. They are receipts from debts previously written off and should be treated as recovery income or a reduction of bad debt expense.

快速自測與答案 Quick Check and Answers

Q1. 為何需要呆帳準備？

Why is an allowance for doubtful accounts needed?

答案：因部分應收帳款可能無法收回。建立準備可避免高估資產，並把估計信貸損失與相關銷售期間配對。

Answer: Some receivables may not be collected. The allowance avoids overstating assets and matches estimated credit losses with the related sales period.

Q2. 期末所需呆帳準備低於現有準備時，應如何處理？

What should be done when required closing allowance is lower than the existing allowance?

答案：應減少呆帳準備，借記呆帳準備，貸記呆帳準備調整或壞帳費用，令本期費用減少。

Answer: Reduce the allowance by debiting allowance for doubtful accounts and crediting allowance adjustment or bad debt expense, reducing current-period expense.

Q3. 壞帳撇銷和呆帳準備有何不同？

What is the difference between writing off bad debts and creating an allowance?

答案：壞帳撇銷是確定不能收回而直接減少個別應收帳款；呆帳準備是對可能不能收回款項的估計，作為抵銷資產帳戶列示。

Answer: Writing off bad debts removes specific receivables confirmed uncollectible; an allowance estimates possible uncollectible amounts and is shown as a contra-asset account.
