管理與企業功能

中英雙語完整筆記 / Complete Bilingual Notes

理解管理職能、企業功能及中小企的營運特點。

管理職能

Management Functions

理解管理的重要性、四項管理職能、組織結構、領導方式及有效管理原則。

Understand the importance of management, the four management functions, organisational structures, leadership styles and principles of effective management.

管理、成效與效率 Management, Effectiveness and Efficiency

管理是透過規劃、組織、領導及控制企業資源，以達成企業目標的過程。	Management is the process of planning, organising, leading and controlling business resources to achieve organisational goals.
成效是達成正確的目標，即「做正確的事」；效率是以較少資源完成工作，即「正確地做事」。	Effectiveness means achieving the right goals, or doing the right things; efficiency means completing work with fewer resources, or doing things right.
良好管理須兼顧成效與效率。企業即使高效率生產不受市場歡迎的產品，仍未能有效達成目標。	Good management requires both effectiveness and efficiency. Producing an unwanted product efficiently still fails to achieve the right goal.

規劃 Planning

規劃是設定目標，並決定達成目標所需行動的過程，可減少不確定性並協調資源。	Planning is the process of setting goals and deciding the actions needed to achieve them. It reduces uncertainty and coordinates resources.
基本流程包括分析現況、設定目標、制定方案、評估及選擇方案、執行和檢討。	A basic process includes analysing the situation, setting goals, developing alternatives, evaluating and selecting a plan, implementation and review.
有效目標應符合 SMART：具體、可量度、可達成、相關及有時限。	Effective goals should be SMART: specific, measurable, achievable, relevant and time-bound.

組織 Organising

組織是安排工作、資源、權力及責任，使員工能協調完成計劃。	Organising arranges work, resources, authority and responsibility so employees can coordinate to carry out plans.
組織圖顯示職位、部門、管理層級及匯報關係。高層管理制定方向，中層管理執行部門計劃，前線管理監督日常工作。	An organisation chart shows positions, departments, management levels and reporting relationships. Top management sets direction, middle management implements departmental plans and first-line management supervises daily work.
直線權力是向下屬下達指令的正式權力；幕僚權力是向直線經理提供專業意見及支援。	Line authority is formal authority to direct subordinates; staff authority provides specialist advice and support to line managers.
部門化可按功能、產品、地區或顧客組織工作。選擇取決於企業規模、產品種類及市場需要。	Departmentalisation may group work by function, product, location or customer. The choice depends on business size, product variety and market needs.

領導與控制 Leading and Controlling

領導是影響及激勵員工達成目標。專制式領導由管理者作決定；參與式領導讓員工參與；放任式領導給予員工較大自主權。

Leading influences and motivates employees to achieve goals. Autocratic leaders decide alone, participative leaders involve employees and laissez-faire leaders give employees substantial autonomy.

沒有一種領導方式適合所有情況。緊急情況可能需要專制式領導；專業及經驗豐富的團隊可能適合參與式或放任式領導。

No leadership style suits every situation. Emergencies may require autocratic leadership, while skilled and experienced teams may suit participative or laissez-faire leadership.

控制包括設定表現標準、量度實際表現、比較實際與標準並分析偏差，以及採取修正行動。

Controlling involves setting performance standards, measuring actual performance, comparing results with standards and analysing deviations, and taking corrective action.

有效管理原則 Principles of Effective Management

工作分工讓員工專門處理特定工作，可提升熟練程度及效率，但過度分工可能令工作沉悶及缺乏彈性。

Division of work allows specialisation and may improve skill and efficiency, but excessive specialisation may create boredom and inflexibility.

統一指揮是每名員工只向一名上司負責；統一方向是具有相同目標的活動由同一計劃及主管協調。

Unity of command means each employee reports to one superior; unity of direction means activities with the same objective follow one plan under one manager.

權力是作出決定及下達指令的權利；責任是完成工作的義務；授權是把部分權力交給下屬，但管理者仍須承擔最終責任。

Authority is the right to decide and give orders; responsibility is the obligation to perform work; delegation transfers some authority to a subordinate while the manager remains ultimately accountable.

目標管理 Management by Objectives (MBO)

目標管理是上司與下屬共同設定可量度目標，定期檢討進度，並根據達成結果評估表現的管理方法。

Management by Objectives is an approach in which managers and subordinates jointly set measurable goals, review progress regularly and evaluate performance according to results.

基本流程包括設定整體目標、把目標分拆至部門與員工、共同制定行動計劃、定期檢討，以及評估成果。

The basic process includes setting organisational goals, translating them into departmental and individual goals, jointly preparing action plans, reviewing progress and evaluating results.

目標管理可提高員工參與、動機及目標一致性，但需要時間溝通；若過度重視可量度短期結果，亦可能忽略質素或長期發展。

MBO may improve employee participation, motivation and goal alignment, but it requires time for communication and may neglect quality or long-term development if measurable short-term results are overemphasised.

關鍵詞彙 Key Terms

管理 Management

透過規劃、組織、領導及控制資源以達成企業目標的過程。

The process of planning, organising, leading and controlling resources to achieve business goals.

成效 Effectiveness

企業達成預定及合適目標的程度。

The extent to which a business achieves its intended and appropriate goals.

效率 Efficiency

企業以最少投入或浪費完成工作的能力。

The ability to complete work with minimum inputs or waste.

SMART 目標 SMART goals

具體、可量度、可達成、相關及有時限的目標。

Goals that are specific, measurable, achievable, relevant and time-bound.

直線權力 Line authority

管理者向直接下屬下達指令的正式權力。

Formal authority held by a manager to direct immediate subordinates.

幕僚權力 Staff authority

專業人員向直線管理者提供意見及支援的權力。

Authority held by specialists to advise and support line managers.

部門化 Departmentalisation

按指定基準把工作及員工分組的過程。

The process of grouping jobs and employees according to a chosen basis.

授權 Delegation

管理者把部分權力交給下屬完成指定工作。

The transfer of some authority from a manager to a subordinate for assigned work.

目標管理 Management by Objectives (MBO)

上司與下屬共同設定目標、檢討進度並按成果評估表現的管理方法。

A management approach in which managers and subordinates jointly set goals, review progress and evaluate performance based on results.

DSE 作答提示 Exam Tips

分析領導方式時，先指出情境特點，例如時間壓力、員工經驗或決策重要性，再解釋最合適的方式。

When analysing leadership styles, identify case features such as time pressure, employee experience or decision importance, then explain the most suitable style.

不要混淆統一指揮與統一方向：前者關乎一名員工只向一名上司匯報，後者關乎相同目標的活動使用同一計劃。

Do not confuse unity of command with unity of direction: the former concerns one employee reporting to one superior; the latter concerns one plan for activities sharing an objective.

分析目標管理時，應指出「共同設定目標」如何提高參與及動機，亦要考慮溝通時間及過度重視量化結果的限制。

When analysing MBO, explain how joint goal setting improves participation and motivation, while considering communication time and excessive focus on measurable results.

快速自測與答案 Quick Check and Answers

Q1. 一間餐廳準時完成大量訂單，但顧客投訴食物質素差。它有效率及有成效嗎？

A restaurant completes many orders on time, but customers complain about poor food quality. Is it efficient and effective?

答案：它可能有效率，因為能快速完成大量訂單；但未必有成效，因為未能滿足顧客對質素的要求。

Answer: It may be efficient because it completes many orders quickly, but it may not be effective because it fails to meet customers' quality expectations.

Q2. 為何在緊急事故中，專制式領導可能較合適？

Why may autocratic leadership be more suitable during an emergency?

答案：管理者可迅速作出統一決定，避免因廣泛討論而延誤行動。

Answer: The manager can make a unified decision quickly and avoid delays caused by extensive discussion.

Q3. 授權後，管理者是否不再承擔責任？

Does a manager stop being responsible after delegation?

答案：不是。下屬獲得完成工作的部分權力，但管理者仍須對結果承擔最終責任。

Answer: No. The subordinate receives authority to perform the task, but the manager remains ultimately accountable for the result.

Q4. 目標管理如何提高員工動機？

How can Management by Objectives improve employee motivation?

答案：員工參與設定自己的目標，較容易理解目標及認同工作方向，並能以明確標準觀察進度及成果。

Answer: Employees participate in setting their goals, making them more likely to understand and accept the direction of work and monitor progress against clear standards.

主要企業功能

Key Business Functions

理解人力資源、財務、營運、市場營銷、資訊及風險管理的角色，以及各功能如何互相配合。

Understand the roles of human resources, financial, operations, marketing, information and risk management and how these functions work together.

人力資源與財務管理 Human Resources and Financial Management

人力資源管理確保企業在適當時間擁有數量及能力合適的員工。工作包括人力規劃、招聘、績效評估、獎勵、培訓及員工關係。

Human resources management ensures that a business has the right number of people with suitable abilities at the right time. Tasks include manpower planning, staffing, appraisal, rewards, training and employee relations.

財務管理負責取得、運用及監察資金。工作包括財務分析、規劃及預算、投資、融資及營運資金決策。

Financial management obtains, uses and monitors funds. Tasks include financial analysis, planning and budgeting, investment, financing and working capital decisions.

營運與市場營銷管理 Operations and Marketing Management

營運管理把投入轉化為商品或服務，並管理生產能力、存貨、品質保證、物流及分銷。

Operations management transforms inputs into goods or services and manages capacity, inventory, quality assurance, logistics and distribution.

市場營銷管理辨認及滿足顧客需要。工作包括市場研究、市場細分、選擇目標市場，以及制定產品、價格、推廣及分銷策略。

Marketing management identifies and satisfies customer needs. Tasks include market research, segmentation, target market selection and product, price, promotion and place strategies.

資訊與風險管理 Information and Risk Management

資料是未經整理的事實；資訊是經處理並對決策有意義的資料。資訊管理負責收集、處理、儲存、保護及傳遞資訊。

Data are raw facts; information is processed data meaningful for decisions. Information management collects, processes, stores, protects and communicates information.

風險管理辨認、評估及處理不確定事件。企業可避免、承擔、減低或轉移風險。

Risk management identifies, assesses and treats uncertain events. A business may avoid, assume, reduce or transfer risk.

企業功能之間的協作 Coordination among Business Functions

企業功能互相依賴。例如市場部預測需求，營運部安排產能，人力資源部招聘員工，財務部提供預算。

Business functions are interdependent. For example, marketing forecasts demand, operations plans capacity, human resources recruits employees and finance provides budgets.

若部門只追求自身目標而缺乏協調，可能造成存貨過多、資金不足、服務延誤或顧客不滿。

If departments pursue their own goals without coordination, the result may be excess inventory, insufficient finance, service delays or customer dissatisfaction.

關鍵詞彙 Key Terms

人力規劃 Manpower planning

預測及安排企業未來所需員工數量和技能的過程。

The process of forecasting and arranging the number and skills of employees needed in the future.

績效評估 Performance appraisal

有系統地評估員工工作表現及發展需要。

The systematic evaluation of employee performance and development needs.

營運資金決策 Working capital decisions

管理現金、存貨、應收帳款及應付帳款等短期資產和負債的決策。

Decisions concerning short-term assets and liabilities such as cash, inventory, receivables and payables.

品質保證 Quality assurance

透過有系統程序預防品質問題並確保產品或服務達到標準。

Systematic procedures used to prevent quality problems and ensure standards are met.

市場細分 Market segmentation

按相似特徵或需要把市場劃分為不同顧客群組。

Dividing a market into customer groups with similar characteristics or needs.

市場組合 Marketing mix

企業用來滿足目標市場的產品、價格、推廣及分銷策略組合。

The combination of product, price, promotion and place strategies used to satisfy a target market.

資料 Data

未經處理及整理的原始事實。

Raw facts that have not yet been processed or organised.

資訊 Information

經處理並對使用者有意義的資料。

Processed data that are meaningful to users.

風險轉移 Risk transfer

透過保險或合約把風險的財務後果轉移給另一方。

Passing the financial consequences of a risk to another party through insurance or contract.

DSE 作答提示 Exam Tips

辨認企業功能時，不要只抄寫功能名稱；應指出該功能的具體工作及如何解決題目中的問題。

When identifying a business function, do not only name it; state its specific task and explain how it solves the case problem.

跨部門題目通常需要完整流程，例如「市場研究發現需求 → 營運增加產能 → 人力資源招聘 → 財務安排資金」。

Cross-functional questions often require a complete process, such as market research identifies demand → operations increases capacity → HR recruits → finance arranges funding.

快速自測與答案 Quick Check and Answers

Q1. 網店收集大量顧客點擊紀錄，但未整理分析。這些紀錄是資料還是資訊？

An online shop collects many customer click records but has not analysed them. Are they data or information?

答案：它們是資料，因為仍是未經處理的原始事實；分析後才能成為有助決策的資訊。

Answer: They are data because they are still raw facts; they become useful information only after analysis.

Q2. 企業購買保險屬於哪種風險管理策略？

Which risk management strategy is used when a business buys insurance?

答案：風險轉移，因為企業把部分潛在財務損失轉移給保險公司。

Answer: Risk transfer, because the business transfers part of the potential financial loss to an insurer.

Q3. 市場營銷部推出大型促銷前，為何應與營運部協調？

Why should marketing coordinate with operations before a major promotion?

答案：營運部須確保有足夠產能、存貨和物流能力滿足增加的需求，避免缺貨或延誤。

Answer: Operations must ensure sufficient capacity, inventory and logistics to meet increased demand and avoid shortages or delays.

中小型企業

Small and Medium Enterprises (SMEs)

理解香港中小企的特點及經濟貢獻，並分析企業家精神如何推動企業發展。

Understand the characteristics and economic contributions of Hong Kong SMEs and analyse how entrepreneurship supports business development.

中小企的特點 Characteristics of SMEs

中小企的營運規模、員工數目及資源通常較少，東主往往直接參與日常管理及決策。

SMEs usually have a smaller operating scale, fewer employees and fewer resources, while owners often participate directly in daily management and decisions.

組織結構較簡單，可快速決策及回應顧客需要，並能為細分市場提供個人化產品或服務。

Their simpler structure supports quick decisions and responses to customer needs, allowing personalised products or services for niche markets.

中小企通常較難取得資金、吸引專業人才及享有規模經濟，亦較容易受到市場變化影響。

SMEs often face difficulties obtaining finance, attracting specialists and achieving economies of scale, and may be more vulnerable to market changes.

中小企對香港經濟的重要性 Importance of SMEs to Hong Kong

中小企數量龐大，為不同技能及地區的勞工創造就業和收入。

The large number of SMEs creates employment and income for workers with different skills and in different locations.

它們促進競爭、創新和產品選擇，亦可迅速回應本地及細分市場需要。

They promote competition, innovation and product choice and can respond quickly to local and niche market needs.

中小企可成為大型企業的供應商、分銷商或服務夥伴，支援整體商業網絡。

SMEs may act as suppliers, distributors or service partners of large firms and support the wider business network.

企業家與企業家精神 Entrepreneurs and Entrepreneurship

企業家辨認商機、組合資源、承擔經計算的風險，並把新構思轉化為可行業務。

Entrepreneurs identify opportunities, combine resources, take calculated risks and turn new ideas into viable businesses.

企業家精神包括創新、主動、適應力、解決問題能力及面對不確定性的意願。

Entrepreneurship involves innovation, initiative, adaptability, problem-solving and willingness to face uncertainty.

數碼平台、外判及合作網絡可讓中小企以較少固定資源接觸顧客和取得專業服務。

Digital platforms, outsourcing and business networks allow SMEs to reach customers and obtain specialist services with fewer fixed resources.

關鍵詞彙 Key Terms

中小型企業 Small and medium enterprise (SME)

營運規模及員工數目相對較小的企業。

A business with a relatively small operating scale and workforce.

企業家 Entrepreneur

辨認商機、組合資源並承擔風險以建立及發展企業的人。

A person who identifies opportunities, combines resources and takes risks to establish and develop a business.

企業家精神 Entrepreneurship

把創新構思轉化為商業機會並承擔經計算風險的能力及意願。

The ability and willingness to turn innovative ideas into business opportunities and take calculated risks.

細分市場 Niche market

具有特定需要或特徵的小型顧客市場。

A small customer market with specific needs or characteristics.

規模經濟 Economies of scale

企業擴大營運規模後，每單位平均成本下降的成本優勢。

Cost advantages that reduce average cost per unit as the scale of operation increases.

DSE 作答提示 Exam Tips

分析中小企優勢時，要把「規模較小」連結到快速決策、個人化服務或靈活回應；分析限制時則連結到資金、人才或成本。

When analysing SME strengths, link small scale to quick decisions, personalised service or flexibility; for limitations, link it to finance, talent or costs.

企業家精神不是單純冒險。高分答案應指出企業家辨認機會、創新及承擔「經計算的風險」。

Entrepreneurship is not simply risk-taking. Strong answers mention identifying opportunities, innovation and taking calculated risks.

快速自測與答案 Quick Check and Answers

Q1. 為何中小企通常較容易為顧客提供個人化服務？

Why can SMEs usually provide more personalised customer service?

答案：組織層級較少，而且東主常直接接觸顧客，因此能快速了解及回應個別需要。

Answer: They have fewer organisational levels and owners often deal directly with customers, allowing quick understanding and response to individual needs.

Q2. 中小企如何支援大型企業？

How can SMEs support large businesses?

答案：它們可提供專門零件、外判服務、分銷或本地市場知識，成為大型企業供應鏈的一部分。

Answer: They can provide specialist components, outsourced services, distribution or local market knowledge as part of a large firm's supply chain.

Q3. 為何快速擴張可能對中小企造成風險？

Why may rapid expansion create risk for an SME?

答案：增長可能超出企業的現金流、人力和營運能力，引致資金短缺、服務質素下降或管理失控。

Answer: Growth may exceed the firm's cash flow, staffing and operating capacity, causing financial shortages, lower service quality or loss of control.
