人力規劃與招聘

Manpower Planning and Staffing

理解人力規劃的重要性和流程，並比較人員供應、調整人手及招聘的不同方法。

Understand the importance and process of manpower planning and compare different methods of sourcing, adjusting and recruiting staff.

人力規劃的重要性 Importance of Manpower Planning

人力規劃是預測企業未來所需員工數量及技能，並制定方案處理人力短缺或過剩。

Manpower planning forecasts the number and skills of employees a business will need and develops plans to deal with shortages or surpluses.

良好人力規劃可確保企業在適當時間、適當職位安排合適員工，減少招聘延誤、閒置人手及過度加班。

Good manpower planning puts suitable employees in the right jobs at the right time and reduces recruitment delays, idle labour and excessive overtime.

企業策略、科技、業務增長、員工流失及外部勞工市場變化均會影響人力需要。

Business strategy, technology, growth, staff turnover and changes in the external labour market all affect manpower needs.

人力規劃流程 Manpower Planning Process

第一步是預測人力需求：根據企業目標、工作量、科技及未來計劃估計所需職位、數量及技能。

The first step is forecasting manpower demand by estimating required jobs, numbers and skills from goals, workload, technology and future plans.

第二步是預測人力供應：檢視現有員工、內部候選人、員工流失率，以及外部候選人的供應。

The second step is forecasting manpower supply by reviewing current employees, internal candidates, staff turnover and the availability of external candidates.

最後比較需求與供應，找出短缺或過剩，制定人手方案，執行後再監察及檢討。

Finally, compare demand and supply, identify shortages or surpluses, develop staffing actions, implement them and monitor the results.

處理人力短缺與過剩 Managing Manpower Shortages and Surpluses

人力短缺可透過永久聘用、臨時聘用、加班、內部調職、培訓或外判處理。選擇取決於需要持續多久及所需技能。

A manpower shortage may be addressed through permanent hires, temporary hires, overtime, internal transfer, training or outsourcing. The choice depends on duration and skill requirements.

人力過剩可透過自然流失、停止招聘、調職、縮短工時、提早退休、鼓勵自願離職或裁員處理。

A manpower surplus may be addressed through natural attrition, a hiring freeze, transfer, shorter hours, early retirement, voluntary resignation or layoff.

裁員可快速減少成本，但可能打擊士氣、損失技能及影響企業聲譽，因此通常應審慎使用。

Layoffs may reduce cost quickly but can damage morale, remove skills and harm reputation, so they should normally be used carefully.

職務分析與招聘準備 Job Analysis and Recruitment Preparation

職務分析有系統地收集工作內容及任職要求資料，是制定職務說明及職位規格的基礎。

Job analysis systematically collects information about work duties and job requirements and forms the basis of a job description and job specification.

職務說明列出工作目的、職責、任務及匯報關係；職位規格列出應徵者所需教育、技能、經驗及個人特質。	A job description states the purpose, duties, tasks and reporting relationships; a job specification states the education, skills, experience and personal qualities required.
清晰資料有助吸引合適申請者、建立公平甄選標準，並減少招聘錯配。	Clear information helps attract suitable applicants, establish fair selection criteria and reduce recruitment mismatch.

內部與外部招聘 Internal and External Recruitment

內部招聘可透過職位公告、晉升或調職尋找候選人。企業較了解員工表現，培訓及適應成本可能較低，亦可提升士氣。	Internal recruitment uses job posting, promotion or transfer. The business knows employee performance, adaptation and training costs may be lower, and morale may improve.
內部招聘的候選人範圍有限，可能缺乏新構思，並在填補一個職位後產生另一職位空缺。	Internal recruitment has a limited candidate pool, may bring fewer new ideas and creates another vacancy when one position is filled.
外部招聘可透過招聘廣告、員工推薦、職業介紹所、招聘會、專業團體或工會接觸較廣泛人才，但成本及適應風險通常較高。	External recruitment may use job advertisements, employee referrals, employment agencies, job fairs, professional institutions or trade unions to reach a wider talent pool, but cost and adaptation risk are normally higher.

關鍵詞彙 Key Terms

人力規劃 Manpower planning 預測未來人力需求及供應，並制定方案處理短缺或過剩的過程。 The process of forecasting future manpower demand and supply and developing actions for shortages or surpluses.	員工流失率 Staff turnover rate 指定期間內離職員工相對平均員工數目的比率。 The proportion of employees leaving during a period relative to the average workforce.
內部候選人 Internal candidate 已在企業任職並申請空缺職位的人。 An existing employee who applies for a vacant position.	永久聘用 Permanent hire 沒有預定終止日期的長期聘用安排。 A long-term employment arrangement without a predetermined end date.
臨時聘用 Temporary hire 為指定期間或工作需要聘用員工的安排。 Hiring employees for a specified period or work requirement.	外判 Outsourcing 把部分工作交由外部服務供應商完成。 Contracting an external service provider to perform selected work.
自然流失 Natural attrition 員工離職或退休後，企業不填補空缺以逐步減少人手。 Gradually reducing staff by not replacing employees who leave or retire.	裁員 Layoff 企業因職位或業務需要減少而終止員工受僱。 Termination of employment because a position or business need has been reduced.
職務分析 Job analysis 有系統地收集工作內容及任職要求資料的過程。 The systematic process of collecting information about job duties and requirements.	職務說明 Job description 說明職位目的、職責、任務及匯報關係的文件。 A document stating a job's purpose, duties, tasks and reporting relationships.
職位規格 Job specification 列出任職者所需教育、技能、經驗及特質的文件。 A document listing the education, skills, experience and qualities required from a job holder.	員工推薦 Employee referral 由現有員工推薦合適人士申請職位的招聘方法。 A recruitment method in which current employees recommend suitable applicants.

DSE 作答提示 Exam Tips

比較招聘方法時，應連結職位需要。例如急需專業人才時，職業介紹所可能較快，但成本亦較高。

When comparing recruitment methods, link them to job requirements. For example, an employment agency may quickly source specialists but at a higher cost.

不要混淆職務說明和職位規格：前者描述工作，後者描述適合做該工作的人。

Do not confuse a job description with a job specification: the former describes the job; the latter describes the person suited to it.

快速自測與答案 Quick Check and Answers

Q1. 企業預計三個月後有一次性大型活動，應考慮永久聘用還是臨時聘用？

A business expects a one-off major event in three months. Should it consider permanent or temporary hires?

答案：臨時聘用通常較合適，因為人力需要只維持短期，可避免活動後出現長期人力過剩。

Answer: Temporary hires are normally more suitable because the need is short term and this avoids a long-term manpower surplus after the event.

Q2. 內部招聘如何提升員工士氣？

How can internal recruitment improve employee morale?

答案：它向員工提供晉升及發展機會，令員工相信良好表現可帶來職涯進展。

Answer: It provides promotion and development opportunities and shows employees that good performance may lead to career progression.

Q3. 職務分析為何應在招聘前進行？

Why should job analysis be completed before recruitment?

答案：它可清楚界定工作及任職要求，讓企業撰寫準確招聘資料並建立合適甄選標準。

Answer: It clearly defines duties and requirements, enabling accurate recruitment information and suitable selection criteria.

績效評估

Performance Appraisal

理解績效評估的目標及基本流程，並分析公平、持續及有效評估的重要性。

Understand the objectives and basic process of performance appraisal and analyse the importance of fair, continuous and effective appraisal.

績效評估的目標 Objectives of Performance Appraisal

績效評估有系統地檢視員工在指定期間的工作表現，並比較實際表現與預定標準或目標。

Performance appraisal systematically reviews an employee's work over a period and compares actual performance with established standards or goals.

評估可向員工提供回饋，辨認優勢、改善範圍及培訓需要，協助員工發展。

Appraisal provides feedback, identifies strengths, areas for improvement and training needs, and supports employee development.

評估結果亦可支援晉升、調職、獎勵、薪酬及人力規劃決策，但若標準不公平，可能損害員工信任。

Results may support promotion, transfer, reward, pay and manpower decisions, but unfair standards may damage employee trust.

績效評估流程 Performance Appraisal Process

首先按職務及企業目標設定清晰、相關、可觀察及可量度的表現標準，並預先向員工說明。

First, establish clear, relevant, observable and measurable performance standards based on the job and business goals, and communicate them in advance.

在評估期間收集可靠表現證據，並把實際表現與標準比較，辨認差距及原因。

During the appraisal period, collect reliable performance evidence, compare actual performance with standards and identify gaps and causes.

管理者與員工進行評估面談，討論成果、提供具體回饋、聆聽員工意見，並共同制定改善及發展計劃。

The manager and employee conduct an appraisal interview to discuss results, provide specific feedback, hear the employee's views and jointly prepare improvement and development plans.

之後應持續監察及跟進，而不是只在年度評估時才討論表現。

Performance should then be monitored and followed up continuously rather than discussed only at an annual appraisal.

有效及公平的評估 Effective and Fair Appraisal

評估標準應與職務相關並一致應用，評估者亦應以具體證據支持判斷。

Appraisal criteria should be job-related and applied consistently, and the appraiser should support judgements with specific evidence.

常見問題包括個人偏見、近期事件影響整體判斷、只根據單一表現，以及標準不清晰。

Common problems include personal bias, allowing recent events to dominate judgement, relying on a single aspect of performance and unclear standards.

雙向溝通、評估者培訓、清晰紀錄及申訴渠道有助改善公平性和員工接受程度。

Two-way communication, appraiser training, clear records and appeal channels help improve fairness and employee acceptance.

關鍵詞彙 Key Terms

績效評估 Performance appraisal

有系統地評估員工在指定期間的工作表現及發展需要。

The systematic assessment of an employee's performance and development needs over a period.

表現標準 Performance standards

用來判斷員工實際表現是否達到要求的準則。

Criteria used to judge whether actual employee performance meets requirements.

評估面談 Appraisal interview

管理者與員工討論評估結果、回饋及發展計劃的會面。

A meeting where a manager and employee discuss appraisal results, feedback and development plans.

表現差距 Performance gap

實際表現與預定標準之間的差異。

The difference between actual performance and an established standard.

回饋 Feedback

讓員工了解其表現及改善方向的具體資料。

Specific information helping an employee understand performance and areas for improvement.

DSE 作答提示 Exam Tips

回答績效評估好處時，應說明評估資料如何引致具體人事決策或改善表現。

When explaining appraisal benefits, state how appraisal information leads to a specific HR decision or performance improvement.

評估流程題要按次序作答：設定標準 → 量度表現 → 比較及分析 → 面談及回饋 → 改善及跟進。

For appraisal-process questions, answer in sequence: set standards → measure performance → compare and analyse → interview and feedback → improve and follow up.

快速自測與答案 Quick Check and Answers

Q1. 為何績效評估標準應在評估期開始前向員工說明？

Why should appraisal standards be communicated before the appraisal period begins?

答案：員工能清楚了解期望及調整工作，亦可減少因標準不清而產生的不公平感。

Answer: Employees can understand expectations and adjust their work, while reducing perceptions of unfairness caused by unclear standards.

Q2. 為何績效評估不應只用於決定薪酬？

Why should performance appraisal not be used only for pay decisions?

答案：它亦應提供回饋、辨認培訓需要、支援發展並改善未來表現；只聚焦薪酬可能令員工防衛及減少坦誠討論。

Answer: It should also provide feedback, identify training needs, support development and improve future performance; focusing only on pay may make employees defensive and reduce honest discussion.

Q3. 管理者只根據最近一次失誤給予員工很低評分，可能出現甚麼問題？

What problem may arise if a manager gives a very low rating based only on one recent mistake?

答案：近期事件過度影響整體判斷，評分未能公平反映整個評估期的表現。

Answer: A recent event dominates the judgement, so the rating does not fairly reflect performance over the whole appraisal period.
