

B3 · BAFS

員工獎勵與發展

中英雙語完整筆記 / Complete Bilingual Notes

理解獎勵、培訓及建立優質團隊的方法。

獎勵管理

Reward Management

理解金錢及非金錢獎勵的特點與作用，並按職位及企業目標比較不同薪酬方式。

Understand the characteristics and purposes of monetary and non-monetary rewards and compare compensation methods according to jobs and business objectives.

獎勵管理與獎勵組合 Reward Management and the Reward Package

獎勵管理是設計及執行獎勵制度，以吸引、挽留和激勵合適員工，並支持企業目標。

Reward management designs and implements reward systems to attract, retain and motivate suitable employees and support business objectives.

金錢獎勵直接增加員工收入，例如基本薪金、佣金、花紅及利潤分享；非金錢獎勵則滿足認同、成長、自主及成就需要。

Monetary rewards directly increase employee income, such as base salary, commission, bonus and profit sharing; non-monetary rewards satisfy needs for recognition, growth, autonomy and achievement.

有效獎勵組合應具公平性、競爭力及可負擔性，並讓員工清楚知道表現與獎勵的關係。

An effective reward package should be fair, competitive and affordable, and employees should clearly understand the link between performance and rewards.

按時薪酬與按表現薪酬 Time-based Pay and Performance-based Pay

按時薪酬按工作時間支付固定工資，收入穩定、行政簡單，適合難以量度個人產出的工作，但直接激勵作用較弱。

Time-based pay provides fixed wages according to time worked. It offers stable income and simple administration and suits jobs where individual output is difficult to measure, but gives weaker direct incentives.

按表現薪酬把收入與產量、銷售或評估結果連結，可鼓勵努力及提高生產力，但可能令員工只追求可量度結果而忽略質素、合作或安全。

Performance-based pay links income to output, sales or appraisal results. It can encourage effort and productivity but may cause employees to neglect quality, teamwork or safety in pursuit of measurable results.

選擇薪酬制度時應考慮工作成果是否可量度、員工能否控制結果、團隊合作的重要性，以及制度成本。

When choosing a pay system, consider whether output is measurable, whether employees control results, the importance of teamwork and the cost of administering the scheme.

主要金錢獎勵方式 Major Forms of Monetary Rewards

件工、佣金及績效加薪直接獎勵個人表現；花紅可獎勵個人或團隊達成短期目標，但收入未必穩定。

Piece rate, commission and merit pay directly reward individual performance; bonuses may reward individuals or teams for short-term targets, but income may be less stable.

利潤分享讓員工分享企業盈利，可加強整體目標意識，但個別員工未必能直接影響利潤，而且低盈利年份的獎勵較少。

Profit sharing gives employees a share of business profit and may strengthen commitment to overall goals, but individuals may have little direct influence on profit and rewards fall in low-profit years.

購股權讓員工日後按指定價格購買公司股份，可鼓勵長期投入，但價值受股價及市場因素影響。

Stock options allow employees to buy company shares later at a specified price and may encourage long-term commitment, but their value depends on share prices and market factors.

員工福利與非金錢獎勵 Employee Benefits and Non-monetary Rewards

員工福利是基本薪酬以外的待遇，例如醫療保障、有薪假期、退休福利及彈性工作安排，有助吸引及挽留人才。

Employee benefits are provisions beyond basic pay, such as medical cover, paid leave, retirement benefits and flexible work arrangements, helping attract and retain employees.

培訓與發展機會、認同與讚賞、工作自主權及更大責任可提升內在動機和工作滿足感。

Training and development opportunities, recognition and appreciation, job autonomy and greater responsibility can strengthen intrinsic motivation and job satisfaction.

福利及非金錢獎勵應切合員工需要；昂貴但不受重視的福利只會增加成本，未必改善表現。

Benefits and non-monetary rewards should match employee needs; costly but unwanted benefits increase cost without necessarily improving performance.

關鍵詞彙 Key Terms

獎勵管理 Reward management

設計及執行獎勵制度，以吸引、挽留和激勵員工的過程。

The process of designing and implementing rewards to attract, retain and motivate employees.

金錢獎勵 Monetary reward

直接以金錢或具有金錢價值的形式給予員工的獎勵。

A reward given directly in money or in a form with monetary value.

非金錢獎勵 Non-monetary reward

不直接增加薪酬，但能滿足認同、成長或自主需要的獎勵。

A reward that does not directly increase pay but satisfies needs such as recognition, growth or autonomy.

基本薪金 Base salary

員工在獎金及額外福利前獲得的固定薪酬。

The fixed pay an employee receives before bonuses and additional benefits.

件工 Piece rate

按員工完成的產品或工作單位數量支付薪酬。

Pay based on the number of units produced or tasks completed.

佣金 Commission

通常按員工完成的銷售額或交易支付的薪酬。

Pay normally based on the value of sales or transactions completed.

花紅 Bonus

達成指定表現或目標後給予的一次性額外款項。

A one-off additional payment for achieving specified performance or targets.

績效加薪 Merit pay

根據員工績效評估結果調整的薪酬增幅。

A pay increase determined by an employee's performance appraisal.

利潤分享 Profit sharing

把企業部分盈利分配給員工的獎勵制度。

A reward scheme that distributes part of business profit to employees.

購股權 Stock option

讓員工在指定期限內按指定價格購買公司股份的權利。

The right for an employee to buy company shares at a specified price within a period.

員工福利 Employee benefits

基本薪酬以外由企業提供的待遇及保障。

Provisions and protection provided by a business in addition to basic pay.

DSE 作答提示 Exam Tips

比較薪酬方法時，不要只列優缺點；應先指出職位成果是否容易量度，再解釋方法是否合適。

When comparing pay methods, do not only list pros and cons; first state whether job output is measurable, then explain why the method is suitable.

獎勵題應區分短期表現激勵與長期挽留效果，並指出可能出現的反效果。

For reward questions, distinguish short-term performance incentives from long-term retention effects and identify possible unintended consequences.

快速自測與答案 Quick Check and Answers

Q1. 為何佣金適合銷售員，但未必適合顧客服務員？

Why may commission suit salespeople but not customer service staff?

答案：銷售額容易量度並可與個人努力連結；顧客服務質素較難量度，佣金亦可能令員工只追求銷售而忽略顧客需要。

Answer: Sales are measurable and can be linked to individual effort; service quality is harder to measure, and commission may encourage selling at the expense of customer needs.

Q2. 利潤分享如何改善員工與企業目標的一致性？

How can profit sharing align employees with business objectives?

答案：企業盈利增加時員工可獲更多獎勵，因此員工更願意改善效率、控制成本及支持整體表現。

Answer: Employees receive more rewards when business profit rises, so they are more willing to improve efficiency, control costs and support overall performance.

Q3. 為何非金錢獎勵仍可有效激勵員工？

Why can non-monetary rewards still motivate employees effectively?

答案：認同、成長、自主及責任可滿足較高層次需要，提升工作滿足感及內在動機。

Answer: Recognition, growth, autonomy and responsibility satisfy higher-level needs and strengthen job satisfaction and intrinsic motivation.

培訓與發展

Training and Development

分辨培訓與發展的目標，並按工作需要評估不同在職及離職培訓模式。

Distinguish the objectives of training and development and evaluate on-the-job and off-the-job training modes according to work needs.

培訓與發展的目標 Objectives of Training and Development

培訓集中改善員工目前工作所需的知識、技能及態度；發展則著眼於員工長期成長及未來較高職責。

Training improves the knowledge, skills and attitudes needed for an employee's current job; development focuses on long-term growth and preparation for greater future responsibilities.

培訓可提高生產力、質素及安全，協助員工適應新科技和工作方法，亦可減少錯誤及監督需要。

Training can improve productivity, quality and safety, help employees adapt to new technology and work methods, and reduce errors and supervision needs.

發展及晉升機會可建立接班人才、提升士氣及挽留員工，但企業須承擔時間和成本，受訓員工亦可能離職。

Development and promotion opportunities build successors, improve morale and retain employees, but require time and cost, and trained employees may still leave.

在職培訓 On-the-job Training

在職培訓在實際工作環境中進行，員工可一邊工作一邊學習，內容貼近職位需要，成本通常較低。

On-the-job training takes place in the actual work environment. Employees learn while working, content is closely related to the job and cost is normally lower.

學徒訓練結合長期實務學習與指導；教練指導由有經驗人士提供個別回饋；工作輪調讓員工在不同職位累積經驗。

Apprenticeship combines long-term practical learning with instruction; coaching provides individual feedback from an experienced person; job rotation gives experience across different jobs.

在職培訓可能受導師能力及工作壓力影響，亦可能把錯誤方法傳給學員，或在學習期間影響服務及生產。

On-the-job training may depend on trainer ability and work pressure, pass poor practices to learners or disrupt service and production during learning.

離職培訓 Off-the-job Training

離職培訓在正常工作地點以外進行，讓員工專注學習並接觸專業導師、新知識及不同觀點。

Off-the-job training takes place away from normal work, allowing employees to focus and gain access to specialist trainers, new knowledge and different perspectives.

講課適合快速向大量學員傳遞理論；程序學習讓學員按自己速度完成單元；模擬訓練可在安全環境練習高風險工作。

Lecturing communicates theory quickly to many learners; programmed learning lets learners complete units at their own pace; simulation provides a safe environment for high-risk practice.

角色扮演適合練習溝通及人際技巧；個案研究訓練分析及決策能力，但離職培訓成本較高，內容亦可能與實際工作有距離。

Role playing develops communication and interpersonal skills; case studies train analysis and decision making, but off-the-job training costs more and may be less closely related to actual work.

選擇及評估培訓 Selecting and Evaluating Training

企業應先分析培訓需要，定立可量度目標，再按工作性質、風險、學員人數、預算及時間選擇培訓模式。

A business should first analyse training needs, set measurable objectives, then choose a mode according to job nature, risk, learner numbers, budget and time.

培訓效果可從學員反應、知識或技能提升、工作行為改變，以及生產力、質素或成本等業務成果評估。

Training effectiveness may be evaluated through learner reaction, gains in knowledge or skills, changes in work behaviour and business results such as productivity, quality or cost.

培訓後應提供實踐及跟進機會，否則員工可能無法把所學轉移到實際工作。

Practice and follow-up opportunities should be provided after training; otherwise employees may fail to transfer learning to actual work.

關鍵詞彙 Key Terms

培訓 Training

提升員工目前工作所需知識、技能及態度的活動。

Activities that improve the knowledge, skills and attitudes required for an employee's current job.

發展 Development

為員工長期成長及未來職責作準備的過程。

The process of preparing employees for long-term growth and future responsibilities.

在職培訓 On-the-job training

在實際工作環境中透過工作進行的培訓。

Training carried out through work in the actual workplace.

學徒訓練 Apprenticeship training

把長期實務工作與有系統指導結合的培訓。

Training that combines long-term practical work with structured instruction.

教練指導 Coaching

由有經驗人士提供個別示範、指導及回饋。

Individual demonstration, guidance and feedback provided by an experienced person.

工作輪調 Job rotation

安排員工輪流擔任不同職位以擴闊經驗。

Moving employees through different jobs to broaden their experience.

離職培訓 Off-the-job training

在正常工作地點及職務以外進行的培訓。

Training conducted away from normal work duties and the usual workplace.

程序學習 Programmed learning

把內容分成單元，讓學員按進度逐步學習。

Learning divided into units that learners complete progressively at their own pace.

模擬訓練 Simulated training

在仿真但受控制的環境中練習工作。

Practising work in a realistic but controlled environment.

角色扮演 Role playing

學員扮演指定角色以練習人際及應變技巧。

Learners act out assigned roles to practise interpersonal and response skills.

個案研究 Case study

分析真實或模擬情境並提出決策的學習方法。

A learning method involving analysis and decisions based on a real or simulated situation.

DSE 作答提示 Exam Tips

選擇培訓方法時，必須連結工作特點。例如高風險設備適合先用模擬訓練，因為可避免真實事故。

When selecting a training method, link it to job characteristics. For example, simulation suits high-risk equipment because it avoids real accidents.

不要只寫在職培訓便宜、離職培訓昂貴；應比較實用性、專注程度、導師質素及對日常工作的影響。

Do not only state that on-the-job training is cheap and off-the-job training is expensive; compare practicality, concentration, trainer quality and disruption to daily work.

快速自測與答案 Quick Check and Answers

Q1. 培訓與發展最主要的分別是甚麼？

What is the main difference between training and development?

答案：培訓集中目前職位所需能力；發展著眼長期成長及未來較高職責。

Answer: Training focuses on abilities needed for the current job; development focuses on long-term growth and greater future responsibilities.

Q2. 航空公司為何會用模擬訓練培訓機師？

Why would an airline use simulation to train pilots?

答案：學員可在仿真環境練習罕見或危險情況，而不會危及乘客、設備或實際營運。

Answer: Learners can practise rare or dangerous situations realistically without risking passengers, equipment or actual operations.

Q3. 企業如何知道培訓是否真正有效？

How can a business know whether training is genuinely effective?

答案：應比較培訓前後的技能、工作行為及業務成果，例如錯誤率、生產力或顧客滿意度。

Answer: It should compare skills, work behaviour and business results before and after training, such as error rates, productivity or customer satisfaction.

建立優質員工隊伍

Development of a Quality Workforce

運用主要激勵理論提升員工效率，並選擇合適內部溝通方案改善員工關係。

Apply major motivation theories to improve employee efficiency and select suitable internal communication programmes to improve employee relations.

激勵與優質員工隊伍 Motivation and a Quality Workforce

激勵是推動員工願意努力達成目標的力量。受激勵員工通常有較高生產力、質素、投入感及留任意願。

Motivation is the force that encourages employees to work towards goals. Motivated employees normally show higher productivity, quality, commitment and willingness to stay.

管理者應了解員工需要及工作情境，再組合薪酬、認同、參與、發展及工作設計，而不是假設同一方法適合所有人。

Managers should understand employee needs and work situations, then combine pay, recognition, participation, development and job design rather than assume one method suits everyone.

激勵方法應與企業目標一致，並持續觀察成效，避免員工為取得獎勵而忽略合作、質素或道德。

Motivation methods should align with business goals and be monitored continuously to prevent employees neglecting teamwork, quality or ethics to obtain rewards.

馬斯洛需求層次理論 Maslow's Hierarchy of Needs Theory

馬斯洛把需要由低至高分為生理、安全與保障、社交、自尊及自我實現需要；較低層次獲合理滿足後，較高層次需要會變得更重要。

Maslow groups needs from lower to higher levels: physiological, safety and security, social, ego and self-actualisation. Higher-level needs become more important after lower-level needs are reasonably satisfied.

薪酬及休息可滿足生理需要；穩定工作及安全環境滿足安全需要；團隊和社交活動滿足社交需要。

Pay and rest satisfy physiological needs; job security and a safe environment satisfy safety needs; teams and social activities satisfy social needs.

認同、職銜及晉升可滿足自尊需要；具挑戰工作、創意、自主及發展機會可支持自我實現。不同員工的需要次序未必完全相同。

Recognition, status and promotion satisfy ego needs; challenging work, creativity, autonomy and development support self-actualisation. Employees may not follow exactly the same order of needs.

赫茲伯格與麥格雷戈理論 Herzberg's and McGregor's Theories

赫茲伯格認為保健因素如薪酬、政策、工作環境及人際關係不足時會引致不滿，但改善後未必能產生持久激勵。

Herzberg argues that inadequate hygiene factors such as pay, policies, working conditions and relationships cause dissatisfaction, but improving them may not create lasting motivation.

激勵因素如成就、認同、責任、晉升及成長可直接提升滿足感及動機，因此工作豐富化比單純加薪更可能產生長期投入。

Motivators such as achievement, recognition, responsibility, advancement and growth directly improve satisfaction and motivation, so job enrichment may create stronger long-term commitment than pay alone.

麥格雷戈 X 理論假設員工不喜歡工作並需嚴密控制；Y 理論假設員工可自我管理、承擔責任及發揮創意。管理方式會影響員工行為及投入。

McGregor's Theory X assumes employees dislike work and need close control; Theory Y assumes employees can self-direct, accept responsibility and be creative. Management style influences employee behaviour and commitment.

內部溝通與員工關係 Internal Communication and Employee Relations

迎新計劃向新員工介紹企業、政策、同事及工作期望，縮短適應時間並減少初期錯誤。

An orientation programme introduces new employees to the business, policies, colleagues and job expectations, reducing adjustment time and early errors.

師友計劃由較有經驗員工提供長期指導和支援；社交聚會建立非正式關係及歸屬感；定期員工會議提供雙向資訊及協調機會。

A mentoring programme provides long-term guidance and support from an experienced employee; social gatherings build informal relationships and belonging; regular staff meetings provide two-way information and coordination.

員工態度調查可匿名收集大量意見及發現問題趨勢，但企業必須保密、公布跟進行動，否則員工可能不願坦誠回應。

An employee attitude survey can anonymously collect broad views and identify trends, but the business must protect confidentiality and communicate follow-up actions or employees may not respond honestly.

關鍵詞彙 Key Terms

激勵 Motivation

推動員工願意付出努力以達成目標的內在或外在力量。

Internal or external forces that encourage employees to exert effort towards goals.

生理需要 Physiological needs

維持基本生活的需要，例如食物、休息及收入。

Basic survival needs such as food, rest and income.

安全與保障需要 Safety and security needs

對人身安全、穩定及保障的需要。

Needs for physical safety, stability and security.

社交需要 Social needs

對歸屬感、友誼及群體接納的需要。

Needs for belonging, friendship and group acceptance.

自尊需要 Ego needs

對成就、地位、尊重及認同的需要。

Needs for achievement, status, respect and recognition.

自我實現需要 Self-actualisation needs

發揮潛能、創意及個人成長的需要。

Needs to realise potential, creativity and personal growth.

激勵因素 Motivators

能直接提升工作滿足感及動機的工作內容因素。

Job-content factors that directly improve satisfaction and motivation.

保健因素 Hygiene factors

不足時會引致不滿，但改善後未必能持久激勵的工作環境因素。

Job-context factors whose absence causes dissatisfaction but whose improvement may not create lasting motivation.

X 理論 Theory X

假設員工不喜歡工作，需要控制、指示及監督的管理觀點。

A management view assuming employees dislike work and require control, direction and supervision.

Y 理論 Theory Y

假設員工可自我管理、接受責任及發揮創意的管理觀點。

A management view assuming employees can self-direct, accept responsibility and be creative.

內部溝通 Internal communication

企業內部不同成員之間交換資訊及意見的過程。

The process of exchanging information and views among members of a business.

迎新計劃 Orientation programme

協助新員工了解企業、同事、規則及工作要求的活動。

Activities helping new employees understand the business, colleagues, rules and job requirements.

師友計劃 Mentoring programme

由較有經驗員工為另一員工提供長期指導及支援。

Long-term guidance and support provided to an employee by a more experienced colleague.

員工態度調查 Employee attitude survey

有系統地收集員工對工作及企業看法的調查。

A systematic survey collecting employees' views about their work and the business.

DSE 作答提示 Exam Tips

應用激勵理論時，要先辨認案例中的未滿足需要或管理假設，再提出對應措施及預期效果。

When applying motivation theories, first identify the unmet need or management assumption in the case, then propose a matching action and expected effect.

不要把赫茲伯格的保健因素寫成激勵因素；保健因素主要防止不滿，激勵因素才直接創造滿足感。

Do not treat Herzberg's hygiene factors as motivators; hygiene factors mainly prevent dissatisfaction, while motivators directly create satisfaction.

快速自測與答案 Quick Check and Answers

Q1. 加薪為何未必能長期激勵員工？

Why may a pay rise fail to motivate employees in the long term?

答案：按赫茲伯格理論，薪酬屬保健因素，改善可減少不滿，但持久動機更需要成就、認同、責任及成長。

Answer: Under Herzberg's theory, pay is a hygiene factor. Better pay reduces dissatisfaction, but lasting motivation requires achievement, recognition, responsibility and growth.

Q2. 管理者採用 Y 理論會如何管理員工？

How would a manager applying Theory Y manage employees?

答案：管理者會給予員工參與、自主權、責任及發揮創意的機會，並較少依賴嚴密監督。

Answer: The manager would provide participation, autonomy, responsibility and opportunities for creativity and rely less on close supervision.

Q3. 企業發現員工不敢在會議提出意見，可如何改善？

How can a business respond when employees are unwilling to raise views in meetings?

答案：可使用保密或匿名的員工態度調查收集意見，並公布實際跟進行動，以逐步建立信任。

Answer: It can use a confidential or anonymous employee attitude survey and communicate actual follow-up actions to build trust over time.
